devices should be analyzed Packed with practical hands on activities students will learn unique subjects from chapters including Mac Forensics Mobile Forensics Cyberbullying and Child Endangerment This well developed book will prepare students for the rapidly growing field of computer forensics for a career with law enforcement accounting firms banks and credit card companies private investigation companies or government agencies

Android Mobile Computing Using Samsung Tablets and Smartphones Running Android 2.3 René Djurup, 2013 An Android smartphone or tablet makes it possible for you to stay online and do your offices and business work wherever you are going With Android you can do almost any computing task you can imagine There are more than 400 000 Android applications apps to choose from The majority of the apps are games and leisure programs However today there are also apps for practically any type of office work and business tasks that you can imagine Many office tasks which until recently could only be performed using a powerful PC or laptop can today easily be done using an Android tablet or smartphone There are several excellent Android apps for word processing and spreadsheet calculations so that these and many other types of office work easily can be done on handheld Android device This has led to a new way of working which is often called mobile computing There are many excellent brands of Android tablets and smartphones on the market Samsung is today seen as the leading manufacturer of Android smartphones and tablets In 2010 Samsung launched the Galaxy Tab 7 1 tablet The Galaxy Tab 7 1 quickly became highly popular and a benchmark for other Android tablets Later more powerful and larger Galaxy tabs have been marketed including the Galaxy Tab 7 7 8 9 and 10 1 This book focuses on the Galaxy Tab 7 1 You will benefit most from the book if you have a Samsung Galaxy Tab 7 1 If you own another tablet or smartphone running on Android 2 2 Froyo or 2 3 Gingerbread you will also benefit from reading the book as the different brands of Android 2 2 2 3 tablets and smartphones work much in the same way The Samsung Galaxy Tab 7 1 tablet is ideal for Android mobile office computing due to its excellent communication capabilities and size It has highly effective and versatile built in chipsets and tools for mobile cellular data communication Wi Fi network connections and Bluetooth communication In addition its GPS antenna and tools make accurate location determination and navigation possible It fits easily into any briefcase and even into a large pocket making it very easy carry around The main challenge of mobile computing is possibly to get online in different situations in a way that is inexpensive secure and effective While both mobile cellular broadband and public Wi Fi networks are rapidly being expanded and improved it may still now and then be difficult or expensive to connect when you are outside your carrier s coverage If you can find a fast and inexpensive connection it may not be secure In this book you get the needed technical background to make it easier for you to get online in an affordable and secure way wherever you are You get detailed information about mobile computing using mobile broadband cellular networks and Wi Fi connections You are introduced to the mobile connection standards 2G 3G and 4G You learn how to set up your Galaxy Tab for different types of mobile communication in your home country and abroad You get detailed instructions on how to use email apps effectively on your

Android smartphone and tablet Last you are introduced to some of the most popular and valuable Android apps for office work and other business tasks The Samsung Galaxy Tab 7 1 exists in two different models as regards mobile communication a CDMA EVDO model primarily intended for the US market and a GSM UMTS model primarily intended for the non US market The book describes both major models

Mobile Tech Report 2014 John R. Roberts, 2014-01-10

If you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what happened in the industry in 2013 and make predictions on what will and won t happen in 2014 You can read what did happen in the mobile technology in 2013 Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement This way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article History is moving so fast now that it is all recorded electronically but I m surprised no one else has collected it and presented it for consideration Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed It s often overlooked that the technology industry is an industry By that I mean its main concerns are profit and growth As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry money out of our wallets So I cover the horse race aspect of the business who s up who s down Is that changing Is that likely to change The longer implications of what the technology industry is doing are vast and social We are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly The entire database of human knowledge is now available in the palm of your hand whenever you desire it Everything is there the good the bad right and wrong hate and love music and noise We are obsessed with technology not in and of itself but as a means to an end Technology is the means to satisfy our curiosity or even our desire for self expression We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore s Law but the real answer is that computers are in their teenage years They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants Their stories are here in the news In short here are predictions for what won t and will happen in 2014 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on Apple Samsung Google Microsoft Nokia Blackberry Amazon Yahoo news about social media giants Facebook Twitter Google LinkedIn Foursquare

SnapChat and the carriers themselves Verizon AT T Sprint and T Mobile You can also review my 2013 mobile predictions and see my track record on predictions Finally there are some essays on how all this mobile tech is figuring into our lives I've divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters Table of Contents Preface Introduction Chapter 1 2014 Predictions Chapter 2 Mobile Marketshare Chapter 3 Apple Chapter 4 Samsung Chapter 5 Google Chapter 6 Microsoft Chapter 7 Nokia Chapter 8 Blackberry Chapter 9 Amazon Chapter 10 Social Media Chapter 11 Yahoo Chapter 12 Carriers Chapter 13 2013 Predictions Chapter 14 Essays Appendix

Advances in Computer Science and Ubiquitous Computing Doo-Soon Park, Han-Chieh Chao, Young-Sik Jeong, James J. (Jong Hyuk) Park, 2015-12-17 This book presents the combined proceedings of the 7th International Conference on Computer Science and its Applications CSA 15 and the International Conference on Ubiquitous Information Technologies and Applications CUTE 2015 both held in Cebu Philippines December 15 17 2015 The aim of these two meetings was to promote discussion and interaction among academics researchers and professionals in the field of computer science covering topics including mobile computing security and trust management multimedia systems and devices networks and communications databases and data mining and ubiquitous computing technologies such as ubiquitous communication and networking ubiquitous software technology ubiquitous systems and applications security and privacy These proceedings reflect the state of the art in the development of computational methods numerical simulations error and uncertainty analysis and novel applications of new processing techniques in engineering science and other disciplines related to computer science [The Rough Guide to the iPad](#) Peter Buckley, 2012-01-01 Looks at the features and functions of the iPad covering such topics as email iTunes iBooks Safari iCloud applications and iPhoto [Daily Graphic](#) Ransford Tetteh, 2014-04-16
