1. Which is a rule for the table below?

Hours Worked	1	3	4	7
Money Earned	\$7	\$21	\$28	\$ ■

- A Add 7
B Subtract 6
C Multiply by 7
D 49

2. Blake uses the rule "subtract 11" for her table. If she starts with 50, what is the next number?

- A 39
B 49
C 61
D 44

3. **Writing to Explain** Look at the table below. Write about how you figure out a rule for the table. Then explain how to use your rule to find the two missing numbers. Finally, make up a pair of numbers that can go at the end of the table.

Earned	\$21	\$27	\$12	\$18	\$33	
Saved	\$7	\$9		\$6		

The rule is

$\times 3$

$$7 \times 3 = 21$$

$$9 \times 3 = 27$$

Teaching Secondary and Middle School Mathematics Daniel J. Brahier, 2020-03-09 Teaching Secondary and Middle School Mathematics combines the latest developments in research, technology, and standards with a vibrant writing style to help teachers prepare for the excitement and challenges of teaching secondary and middle school mathematics. The book explores the mathematics teaching profession by examining the processes of planning teaching and assessing student progress through practical examples and recommendations. Beginning with an examination of what it means to teach and learn mathematics, the reader is led through the essential components of teaching, concluding with an examination of how teachers continue with professional development throughout their careers. Hundreds of citations are used to support the ideas presented in the text, and specific websites and other resources are presented for future study by the reader. Classroom

scenarios are presented to engage the reader in thinking through specific challenges that are common in mathematics classrooms. The sixth edition has been updated and expanded with particular emphasis on the latest technology resources and standards. The reader is introduced to the ways that students think and how to best meet their needs through planning that involves attention to differentiation as well as how to manage a classroom for success. Features include: The entire text has been reorganized so that assessment takes a more central role in planning and teaching. Unit 3 of 5 now addresses the use of summative and formative assessments to inform classroom teaching practices. A new feature, Links and Resources, has been added to each of the 13 chapters. While the book includes a substantial listing of citations and resources after the chapters, five strongly recommended and practical resources are spotlighted at the end of each chapter as an easy reference to some of the most important materials on the topic. Approximately 150 new citations have either replaced or been added to the text to reflect the latest in research materials and resources that support the teaching of mathematics. A Quick Reference Guide has been added to the front of the book to assist the reader in identifying the most useful chapter features by topic. A significant revision to Chapter 13 now includes discussions of common teaching assessments used for field experiences and licensure as well as a discussion of practical suggestions for success in methods and student teaching experiences. Chapter 9 on the practical use of classroom technology has been revised to reflect the latest tools available to classroom teachers including apps that can be run on handheld personal devices. An updated Instructor's Manual features a test bank, sample classroom activities, Powerpoint slides, chapter summaries, and learning outcomes for each chapter and can be accessed by instructors online at www.routledge.com/9780367146511.

Prediction and Causality in Econometrics and Related Topics Nguyen Ngoc Thach, Doan Thanh Ha, Nguyen Duc Trung, Vladik Kreinovich, 2021-07-26. This book provides the ultimate goal of economic studies: to predict how the economy develops and what will happen if we implement different policies. To be able to do that, we need to have a good understanding of what causes what in economics. Prediction and causality in economics are the main topics of this book's chapters. They use both more traditional and more innovative techniques, including quantum ideas, to make predictions about the world economy, international trade, exchange rates, about a country's economy, gross domestic product, stock index, inflation rate, and about individual enterprises, banks, and micro-finance institutions, their future performance, including the risk of bankruptcy, their stock prices, and their liquidity.

Several papers study how COVID 19 has influenced the world economy This book helps practitioners and researchers to learn more about prediction and causality in economics and to further develop this important research direction
