Understanding Intrusion Detection through Visualization Stefan Axelsson, David Sands, 2006-06-01 This monograph is the outgrowth of Stefan Axelson s PhD Dissertation at Chalmers University in G teborg

Sweden The dissertation in turn collects a number of research efforts performed over a period of six years or so into a coherent whole It was my honor to serve as the opponent at Dr Axelsson s examination In the Swedish system it is the job of the opponent to place the candidate s work into a broader perspective demonstrating its significance and contributions to the field and then to introduce the work to the attendees at the examination This done the candidate presents the technical details of the work and the opponent critiques the work giving the candidate the opportunity to defend it This forward is adapted from the introduction that I gave at the examination and should serve to acquaint the reader not only with the work at hand but also with the field to which it applies The title of the work Under standing Intrusion Detection Through Visualization is particularly telling As is the case with any good piece of research we hope to gain an understanding of a problem not just a recipe or simple solution of immediate but limited utility For much of its formative period computer security concentrated on devel oping systems that in effect embodied a fortress model of protection

People and Environment Gareth Jones, 2014-06-11 *People and Physical Environment* A Global Approach provides an introduction to the main areas of environmental concern for geographers environmental scientists and planners at the beginning of the twenty first century These include Pollution of the atmosphere and its impact on our climate The exploitation of the oceans Management and supply of fresh water Degradation of the land and Biodiversity and the need to maintain genetic diversity The book argues that our knowledge and understanding of the environment is now so great that we can predict with considerable accuracy where the skills of science and technology need to be focussed in order to prevent severe environmental damage from occurring Achieving successful management of the environment has become dependent upon active participation of a society prepared to pay for a high quality of life and the willingness of our elected politicians to legislate and enforce the very highest standards of environmental management This book will be essential reading for students of geography environmental studies science and land use planners and will also contribute valuable information for climatology biogeography hydrology land economy and forestry students
