Symposium Proceedings Innovative Teaching Practices Janina Morska, Alan Rogerson, 2023-06-14 This volume contains the papers presented at the International Symposium Innovative Teaching Practices held on August 14-18, 2023, in The Queen's College Oxford University. Science Education in Canada Christine D. Tippet, Todd M. Milford, 2019-07-01 This book offers a meso-level description of demographics, science education, and science teacher education. Representing all 13 Canadian jurisdictions, the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes. The book highlights commonalities, consistencies, and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction-specific chapters. Although the analysis indicates a network of policy and practice issues warranting further consideration, the diverse nature of Canadian science education makes simple identification of causal relationships elusive. Canada has a reputation for strong science achievement. However, there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education. This book fills that gap by presenting a thorough description of science education at the provincial/territorial level as well as a more holistic description of pressing issues for Canadian science education.

Pursuing quality education in Physical and Rehabilitation Medicine Francesca Gimigliano, Maria Gabriella Ceravolo, Jorge Lains, 2023-08-15 High quality rehabilitation care represents a constitutive element of health systems worldwide. The harmonization of staff education both at the undergraduate and postgraduate level is a key element for ensuring the highest standard of rehabilitation care. International bodies like the UEMS Board for Physical and Rehabilitation Medicine (PRM) or the International Society for PRM have already delivered regulatory documents setting standards in postgraduate PRM education. The implementation of such rules is to be validated worldwide with special attention to low and middle income countries. This Research Topic aims to stimulate awareness in the scientific community, especially for those involved in postgraduate education and policy-making decisions. It will highlight the need for developing competency-based education as a powerful mechanism to align education and training with health system priorities. This holds particular value for resource-limited countries where the knowledge and skills of rehabilitation doctors need to reflect not only the population's health profile but also the strengths and weaknesses, e.g., workforce gaps and maldistributions of the health system. This goal can be achieved through sharing experiences between those who have engaged themselves in the process of program development, curriculum design, and competency-based education in rehabilitation. Over the last 25 years, the number of papers addressing the issue of residency education in PRM has exponentially increased, testifying the interest towards the role of rehabilitation

and more specifically of the PRM doctors as leaders of the rehabilitation team GED Test For Dummies Murray Shukyn,Dale E. Shuttleworth,Achim Krull,2014-10-27 Presents subject review full length practice tests with answer explanations and test taking strategies to help readers prepare for and score higher on the high school equivalency test
