Foerstel, 2013-05-23 Despite concerted efforts from our educators administrators and government American education continues to struggle The author of this work argues that the decline can be traced to censored curricula inaccurate textbooks test driven evaluations and increasing poverty among the student population Under the definition of failure specified in the No Child Left Behind Act more than 80 percent of American schools could currently be labeled as failing while the quality of American education overall and our students performance continue to rank unfavorably against international competition This book examines the crisis in American education and identifies how weaknesses in textbooks teaching and testing have created the crisis facing American education a topic that dramatically affects students teachers and parents Author Herbert N Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today His book traces the legal basis for curricular censorship that dates back 75 years identifies the bizarre process by which shoddy textbooks have been written published and come to be widely accepted and documents the disastrous effect that reliance on these materials has had on the curriculum Foerstel also supplies a careful

assessment of the current political debate over education reform and of the proposed solutions to these problems

Simkins,Mark Maier,2023-07-03 Just in Time Teaching JiTT is a pedagogical approach that requires students to answer
questions related to an upcoming class a few hours beforehand using an online course management system While the phrase
just in time may evoke shades of slap dash work and cut corners JiTT pedagogy is just the opposite It helps students to view
learning as a process that takes time introspection and persistence Students who experience JiTT come to class better
prepared and report that it helps to focus and organize their out of class studying Their responses to JiTT questions make
gaps in their learning visible to the teacher prior to class enabling him or her to address learning gaps while the material is
still fresh in students minds hence the label just in time JiTT questions differ from traditional homework problems in being
designed not only to build cognitive skills but also to help students confront misconceptions make connections to previous
knowledge and develop metacognitive thinking practices Students consequently spend more time on course concepts and
ideas but also read their textbooks in ways that result in more effective and deeper learning Starting the class with students

work also dramatically changes the classroom learning environment creating greater student engagement This book demonstrates that JiTT has broad appeal across the academy Part I provides a broad overview of JiTT introducing the pedagogy and exploring various dimensions of its use without regard to discipline Part II of the book demonstrates JiTT's remarkable cross disciplinary impact with examples of applications in physics biology the geosciences economics history and the humanities Just in Time Teaching article from The Hispanic Outlook in Higher Education Reprinted with permission from Hispanic Outlook in Higher Education Magazine www.hispanicoutlook.com The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate Stephen J. Ceci, Wendy M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women's underrepresentation in science Everyone is interested academics politicians parents high school girls and boys women in search of college majors administrators working to accommodate women's educational interests the list goes on But one thing often missing is an evidence based examination of the problem uninfluenced by personal opinions accounts of lived experiences anecdotes and the always encroaching inputs of popular culture This is why this special issue of Frontiers in Psychology can make a difference In it a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical objective approaches to understanding women's underrepresentation in science today The questions considered within this special issue span academic disciplines methods levels of analysis and nature of analysis what these articles share is their scholarly evidence based approach to understanding a key issue of our time High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Connector Reliability for Offshore Oil and Natural Gas Operations, 2018-06-12 Commercially significant amounts of crude oil and natural gas lie under the continental shelf of the United States Advances in locating deposits and improvements in drilling and recovery technology have made it technically and economically feasible to extract these resources under harsh conditions But extracting these offshore petroleum resources involves the possibility however remote of oil spills with resulting damage to the ocean and the coastline ecosystems and risks to life and limb of those performing the extraction The environmental consequences of an oil spill can be more severe underwater than on land because sea currents can quickly disperse the oil over a large area and thus cleanup can be problematic Bolted connections are an integral feature of deep water well operations High Performance Bolting Technology for Offshore Oil and Natural Gas Operations summarizes strategies for improving the reliability of fasteners used in offshore oil exploration equipment as well as best practices from other industrial sectors It focuses on critical bolting bolts studs nuts and fasteners used on critical connections *New South African Review 1* Doreen Atkinson, Prishani Naidoo, Devan Pillay, Roger Southall, 2010-11-01 Is South Africa on a long term decline The New South African Review revives the tradition of critical analytical scholarship developed by the South

African Review in the 1970s and 1980s Accessible to a wide readership and drawing upon authors from well beyond academia its objective is to be informative discursive and at times downright provocative It seeks to provide contemporary comment and engage with current controversies The first volume in the series 2010 Development or Decline ranges widely across the implications of the international crisis for the economy the threats to our fragile ecology of present economic strategies through to the state of the ANC and the public service issues around service delivery migration HIV Aids land reform crime the sexual behaviour of our youth and much more Posing the provocative question of whether South Africa is embarking upon a long term decline the volume simultaneously argues the potential for a society premised upon social equality social coherence and sustainability This collection will appeal to both national and international audiences interested in engaging with the multiple dilemmas and challenges facing contemporary South Africa
