On Non-Generic Finite Subgroups of Exceptional Algebraic Groups Alastair J. Litterick,2018-05-29 The study of finite subgroups of a simple algebraic group G reduces in a sense to those which are almost simple If an almost simple subgroup of G has a socle which is not isomorphic to a group of Lie type in the underlying characteristic of G then the subgroup is called non generic This paper considers non generic subgroups of simple algebraic groups of exceptional type in arbitrary characteristic

Earth Systems Data Processing and Visualization Using MATLAB Zekâi Şen,2019-03-27 This book is designed to provide easy means of problem solving based on the science philosophical and logical rules that lead to effective and reliable software at the service of professional earth system scientists through numerical scientific computation techniques Through careful examination of software illuminated by brief scientific explanations given in the book the reader may develop his/her skills of computer program writing Science aspects that are concerned with earth systems need numerical computation procedures and algorithms of data collected from the field measurements or laboratory records The same is also valid for data processing in social sciences and economics Some of the data assessment and processing procedures are at the large scales and complex and therefore require effective and efficient computer programs Data reduction and graphical display in addition to probabilistic and statistical calculations are among the general purposes of the book Not only students work but also projects of researchers

at universities and tasks of experts in different companies depend on reliable software Especially potential users of MATLAB in earth systems need a guidance book that covers a variety of practically applicable software solutions **Thriving on Our Changing Planet** National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Decadal Survey for Earth Science and Applications from Space, 2018-12-20 We live on a dynamic Earth shaped by both natural processes and the impacts of humans on their environment It is in our collective interest to observe and understand our planet and to predict future behavior to the extent possible in order to effectively manage resources successfully respond to threats from natural and human induced environmental change and capitalize on the opportunities social economic security and more that such knowledge can bring By continuously monitoring and exploring Earth developing a deep understanding of its evolving behavior and characterizing the processes that shape and reshape the environment in which we live we not only advance knowledge and basic discovery about our planet but we further develop the foundation upon which benefits to society are built Thriving on Our Changing Planet presents prioritized science applications and observations along with related strategic and programmatic guidance to support the U S civil space Earth observation program over the coming decade Force Multiplying Technologies for Logistics Support to Military Operations National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Force Multiplying Technologies for Logistics Support to Military Operations, 2014-12-15 The mission of the United States Army is to fight and win our nation's wars by providing prompt sustained land dominance across the full range of military operations and spectrum of conflict in support of combatant commanders Accomplishing this mission rests on the ability of the Army to equip and move its forces to the battle and sustain them while they are engaged Logistics provides the backbone for Army combat operations Without fuel ammunition rations and other supplies the Army would grind to a halt The U S military must be prepared to fight anywhere on the globe and in an era of coalition warfare to logistically support its allies While aircraft can move large amounts of supplies the vast majority must be carried on ocean going vessels and unloaded at ports that may be at a great distance from the battlefield As the wars in Afghanistan and Iraq have shown the costs of convoying vast quantities of supplies is tallied not only in economic terms but also in terms of lives lost in the movement of the materiel As the ability of potential enemies to interdict movement to the battlefield and interdict movements in the battlespace increases the challenge of logistics grows even larger No matter how the nature of battle develops logistics will remain a key factor Force Multiplying Technologies for Logistics Support to Military Operations explores Army logistics in a global complex environment that includes the increasing use of antiaccess and area denial tactics and technologies by potential adversaries This report describes new technologies and systems that would reduce the demand for logistics and meet the demand at the point of need make maintenance more efficient improve inter and intratheater mobility and improve near real time in transit visibility Force Multiplying Technologies also explores options for the Army to

operate with the other services and improve its support of Special Operations Forces This report provides a logistics centric research and development investment strategy and illustrative examples of how improved logistics could look in the future
