*Finishing Abstracts*, 1971 Numerical Development - From cognitive functions to neural underpinnings Korbinian Moeller, Elise Klein, Klaus F Willmes - von Hinckeldey, Karin Kucian, 2015-02-24 Living at the beginning of the 21st century requires being numerate because numerical abilities are not only essential for life prospects of individuals but also for economic interests of post industrial knowledge societies Thus numerical development is at the core of both individual as well as societal interests There is the notion that we are already born with a very basic ability to deal with small numerosities Yet this often called number sense seems to be very restricted approximate and driven by perceptual constraints During our numerical development in formal e g school but also informal contexts e g family street we acquire culturally developed abstract symbol systems to represent exact numerosities in particular number words and Arabic digits refining our numerical

capabilities In recent years numerical development has gained increasing research interest documented in a growing number of behavioural neuro scientific educational cross cultural and neuropsychological studies addressing this issue Additionally our understanding of how numerical competencies develop has also benefitted considerably from the advent of different neuro imaging techniques allowing for an evaluation of developmental changes in the human brain In sum we are now starting to put together a more and more coherent picture of how numerical competencies develop and how this development is associated with neural changes as well In the end this knowledge might also lead to a better understanding of the reasons for atypical numerical development which often has grievous consequences for those who suffer from developmental dyscalculia or mathematics learning disabilities Therefore this Research Topic deals with all aspects of numerical development findings from behavioural performance to underlying neural substrates from cross sectional to longitudinal evaluations from healthy to clinical populations To this end we included empirical contributions using different experimental methodologies but also theoretical contributions review articles or opinion papers Positive Youth Development, Mental Health, and Psychological Well-Being in Diverse Youth Nora Wiium, Laura Ferrer-Wreder, Jennifer E. Lansford, Lene Arnett Jensen, 2023-06-15 In this Research Topic our aim is to examine how personal resources related to competencies skills and self perception as well as environmental contextual and relational features of the social contexts of diverse youth directly or indirectly are important to mental health and psychological well being As previous research on young people has mainly focused on youth's weaknesses rather than their strengths our use of Positive Youth Development PYD in working with culturally diverse youth and their well being in this Research Topic is novel We invite contributions from researchers that were initially presented their papers in a meeting that was held by research partners of the Cross National Project on Positive Youth Development CN PYD and who represent an international and multidisciplinary panel of experts on PYD The CN PYD was initiated in 2014 at the University of Bergen and has an ongoing data collection that involves approximately 10 000 minority and majority youth and emerging adults ages 16 to 29 living in Africa Asia Australia Europe New Zealand and South America CN PYD uses a strengths based approach to the conceptualization of youth as resources and agentic which is in opposition to the view of the developmental period of adolescence as being a period inherently fraught with problems and risks The goal of the cross national project is to assess personal strengths and contextual resources considering how these resources come together to facilitate youth thriving and to document how young people make positive and valued contributions to themselves and others We also advance research on the complex interplay between personal and contextual resources and their connections with risk behaviors and problems in essence taking a perspective of the whole child both in terms of strengths and problems **Journal of Developmental Education** ,2015 **Engineered Materials Abstracts** ,1991-07 Science Citation Index ,1992 Vols for 1964 have guides and journal lists
