

# Practice makes perfect: Guided practice helps students develop into expert problem solvers

The new 15th Edition of *University Physics with Modern Physics* draws on data insights from hundreds of faculty and thousands of student users to address one of the biggest challenges for students in introductory physics courses: seeing the connections between worked examples in their textbook and related homework or exam problems. This edition offers multiple resources to address students' tendency to focus on the objects, situations, numbers, and questions posed in a problem, rather than recognizing the underlying principle or the problem's type. **Mastering™ Physics** gives students instructional support and just-in-time remediation as they work through problems, and links all end-of-chapter problems directly to the Pearson eText for additional guidance.

*Handbook of College Reading and Study Strategy Research* ,     **Performing Farmscapes** Susan C.

Haedicke, 2021-12-06 This book argues that the performance based work in the featured case studies contributes to the construction of food democracy where the public takes back decision making in shaping the food system. It explores how contemporary artists translate scientific research about local and global agricultural issues into life stories that inform and engage their audiences and in so doing transform passive food consumers into proactive food citizens. The pairing of performing and farmscapes, complex webs of farmlands and storylines, enables artists to use embodied practices to encourage audiences to imagine a just and sustainable agri-food system and to collaborate on making it a reality. The book arranges the case studies on a trajectory that moves from projects that foreground knowledge acquisition to ones that emphasize social engagement by creating conversations and coalitions between farming and nonfarming communities to a final one that pairs protest art and political activism to achieve legally binding changes in the agricultural landscape.
