

7-2 Review and Reinforcement (continued)

Write Lewis structures for each of the following molecules. Indicate the bonds with either dots or dashes.

Answer the following questions as directed.

21. Explain why the molecule SF_6 is an exception to the octet rule.

In this molecule, 10 electrons surround the sulfur atom,
not 8. the sulfur atom holds the additional electrons in
its empty 3d

22. Explain the relationship between electronegativity and polarity.

An atoms $e(-)$ is a number that indicates how strongly it attracts the
electrons ina chemical bond with another atom. thus the
electronegativity difference between the two atoms in a bond
indicates the bond's polarity. or charge shift. The greater the
electronegativity, the greater the polarity of the bond

23. Compare and contrast single, double, and triple covalent bonds.

these bonds are all covalent bonds. single bonds involve one
shared pair. double bonds involve two shared pares, and triple
bonds involve three shared pairs.

Howie, Tjeerd Plomp, 2006-04-18 This book is the result of research from over fifteen countries asking which background and environmental factors influence achievement in mathematics and science This research is based on data from the Third International Mathematics and Science Study TIMSS which was conducted under the auspices of the International Association for the Evaluation of Educational Achievement IEA in 1995 and 1998 In many countries researchers have started secondary analysis of the data in search for relationships between contextual factors and achievement In these analyses two different approaches can be distinguished which can be characterised by the metaphors of fishing and hunting

In the fishing approach researchers begin with an open mind considering all possible context variables as potentially influential Applying analysis techniques such as regression analysis Lisrel PLS HLM and MLN they then identify important factors within their countries or across a number of countries In the hunting approach researchers hypothesise certain context variables and trace the effect of these variables on mathematics and or science achievement
