Posamentier and Stephen Krulik present ten basic strategies that are effective for finding solutions to a wide range of mathematics problems. These tried and true methods including working backwards, finding a pattern, adopting a different point of view, solving a simpler analogous problem, and making a visual representation make problem solving easier, neater, and more understandable for students as well as teachers. Providing numerous sample problems that illustrate how mathematics teachers and specialists can incorporate these techniques into their mathematics curriculum, this updated edition also includes a variety of new problems that show how to use the strategies. References to current NCTM standards. Solutions to the problems in each chapter. Extensive discussions of the empowering strategies used to solve sample problems. The second edition of *Problem Solving Strategies for Efficient and Elegant Solutions Grades 6-12* helps teachers develop students' creative problem solving skills for success in and out of school.

Developing Technology Mediation in Learning Environments Soares, Filomena, Lopes, Ana Paula, Brown, Ken, Uukkivi, Anne, 2019-12-27. Most technologies have been harnessed to enable educators to conduct their business remotely. However, the social context of technology as a mediating factor needs to be examined to address the perceptions of barriers to learning due to the lack of social interaction between a teacher and a learner in such a setting. *Developing Technology Mediation in Learning Environments* is an essential reference source that widens the scene of STEM education with an all-encompassing approach to technology-mediated learning, establishing a context for technology as a mediating factor in education. Featuring research on topics such as distance education, digital storytelling, and mobile learning, this book is ideally designed for teachers, IT consultants, educational software developers, researchers, administrators, and professionals seeking coverage on developing digital skills and professional knowledge using technology.

Curriculum Integration in Contemporary Teaching Practice: Emerging Research and Opportunities Brown, Susannah, Bousalis, Rina, 2017-12-30. Teaching and learning practices that are interconnected and value all subject areas benefit K-12 students by supporting creativity, critical thinking, communication, and collaboration. *Curriculum Integration in Contemporary Teaching Practice: Emerging Research and Opportunities* is an essential scholarly resource that presents detailed information on the benefits and implementation of STREAMS (Science, Technology, Reading, Engineering, Arts, Mathematics, and Social Studies), an interdisciplinary curriculum that meets K-12 students' diverse needs by placing equal emphasis on multiple avenues of learning. Highlighting topics such as educational science and technology, curriculum development, and instructional design, this book is an ideal resource for students, academicians, researchers, and librarians seeking current information on interdisciplinary education.
