

1. **Answer:** B

Explanation: We can see that both nuclides have different mass numbers and atomic numbers. However, we can determine that both nuclides have 16 neutrons. By definition, atoms with the same number of neutrons but different numbers of protons are called isotones.

2. **Answer:** A

Explanation: Remember that there are only two rules in balancing nuclear reactions, and these are the total of the subscripts and superscripts on the left side of the reaction must be equal to the total of the subscripts and superscripts on the right side. On the left side, the total of the superscripts is 29. To balance this, A must be 28. For the subscripts, the total on the left side is 14; therefore Z must be 13. With this, options C and D are already eliminated as the correct answer. Between options A and B, recall that the atomic number (Z) is unique for every element and can be seen in the periodic table as the number listed on top of the chemical symbol. With this, Al is the only element with an atomic number of 13, hence the correct answer is option A. Most examinations provide a copy of the periodic table of elements, but to be sure, it is advisable to memorize some of the common elements, their chemical symbols, atomic mass, and atomic number.

3. **Answer:** B

Explanation: By balancing the given reaction, we can determine that the correct identity of A_ZX is actually ${}^4_2\text{He}$. Since an alpha particle was emitted, the reaction is an alpha decay or alpha particle emission reaction.

4. **Answer:** A

Explanation: If no values were given, you can always assign arbitrary values to visualize the problem. For this problem, let's say we have 1.0 g of ${}^{131}\text{I}$ as the initial amount. After 8 days (1^{st} half-life), the amount will be reduced to half the original amount, which is 0.5 g. After another 8 days (2^{nd} half-life), the amount will be further reduced to half, from 0.5 g to 0.25 g. At this point,

Examinations Ananya Ganguly, 2011 Fundamentals of Inorganic Chemistry for Competitive Examinations is the signature compilation of the class tested notes of iconic chemistry coach Ananya Ganguly. It features the unique teaching methodology of the author and her authoritative approach in the teaching of concepts, their application and strategy to champion the IITJEE high task. Each chapter unfolds the structured systematic and patterned chemistry concepts in lucid and student friendly approach. The book is without those unnecessary frills that make the bulk in other popular books in the market for the IIT JEE. An indispensable must have for in depth comprehension of chemistry for the coveted IIT JEE. *Engineering in K-12 Education* National Research Council, National Academy of Engineering, Committee on K-12 Engineering Education, 2009-09-08 Engineering education in K 12 classrooms is a small but growing phenomenon that may have implications for engineering and also for the other STEM subjects science technology and mathematics. Specifically engineering education may improve student learning and achievement in science and mathematics increase awareness of engineering and the work of engineers boost youth interest in pursuing engineering as a career and increase the technological literacy of all students. The teaching of STEM subjects in U S schools must be improved in order to retain U S competitiveness in the global economy and to develop a workforce with the knowledge and skills to address technical and technological issues. Engineering in K 12 Education reviews the scope and impact of engineering education today and makes several recommendations to address curriculum policy and funding issues. The book also analyzes a number of K 12 engineering curricula in depth and discusses what is known from the cognitive sciences about how children learn engineering related concepts and skills. Engineering in K 12 Education will serve as a reference for science technology engineering and math educators policy makers employers and others concerned about the development of the country's technical workforce. The book will also prove useful to educational researchers cognitive scientists advocates for greater public understanding of engineering and those working to boost technological and scientific literacy.
