

Microbiology of Pathogenic Factors

Interactions Between Microbe and Host

The Microbe

- Few are **pathogenic**
- Many benefit the host, or simply colonize the host without causing disease (ex. Vitamin K)
- Human body: 10 trillion cells + 100trillion bacterial cells

The Host

- Host factors greatly influence the relationship between microbe and host
 - We age, we are immunosuppressed, our microbiome can shift; we are more susceptible to infection

Next few slides, we will review the relationship between microorganisms and the **healthy human host**

Interactions Between Microbe and Host – Symbiosis

Commensalism

- One organism benefits from the relationship
- Saprophytic mycobacteria of the ear and external genitals
 - Live on secretions and sloughed-off cells causing no benefit or harm to the host

Mutualism

- Both organisms benefit from the relationship
- Escherichia Coli in the large intestine synthesize Vitamin K
 - Vitamin K is absorbed into the blood stream and is used by the host
- In return, the large intestine of the host provides nutrients used by the bacteria, facilitating their survival

Parasitism

- One organism benefits from the relationship at the expensive of the other
- Infectious process
- This is what infection means – there is damage to the host; there is harm to the host
- Amensalism- one microorganism harms another with the host

TABLE 14.1 Types of Symbiotic Relationships

	Organism 1	Organism 2	Example
Mutualism	Benefits	Benefits	Bacteria in human colon
Commensalism	Benefits	Neither benefits nor is harmed	Molds in human hair follicles
Amensalism	Is harmed	Neither benefits nor is harmed	Fungus secreting an antibiotic, inhibiting nearby bacteria
Parasitism	Benefits	Is harmed	Tuberculous bacteria in human lung

Interactions between Microbe and Host – Normal Flora

Normal flora → varies depending on the organ system we are referring to, ex. the environment of our skin is different than respiratory flora

- Resident microbiota permanently colonizes the host -acquire shortly after birth
- Transient microbiota temporarily colonizes the host – commensalism, mutualism, associated with changes in our environment, ex. india we go there, the environment is different, the air,

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers.
