How to Run a College Brian C. Mitchell, W. Joseph King, 2018-01-15 How can colleges stay relevant in the twenty first century Residential colleges are the foundation on which US higher education is based These institutions possess storied traditions fondly cherished by students alumni and faculty There is no denying however that all colleges today struggle with changing consumer preferences high sticker prices and aging infrastructure Technological and pedagogical alternatives not to mention growing political pressure present complex challenges What can colleges and smaller universities do to stay relevant in today's educational and economic climate In their concise guide *How to Run a College* Brian C Mitchell and W Joseph King analyze how colleges operate Widely experienced as trustees administrators and faculty they understand that colleges must update their practices monetize their assets and focus on core educational strategies in order to build strong institutions Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their fundamental strengths To survive and become sustainable they must be centers of dynamic learning as well as economic engines able to power regional state and national economies Rejecting the notion that American colleges are holdovers from a bygone time *How to Run a College* shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide

University City Laura Wolf-Powers, 2022-09-20 A chronicle of neighborhood redevelopment politics in West Philadelphia over 60 years In twenty first century American cities policy makers increasingly celebrate university sponsored innovation districts as engines of inclusive growth But the story is not so simple In *University City* Laura Wolf Powers chronicles five decades of planning in and around the communities of West Philadelphia's University City to illuminate how

the dynamics of innovation district development in the present both depart from and connect to the politics of mid twentieth century urban renewal Drawing on archival and ethnographic research Wolf Powers concludes that even as university and government leaders vow to develop without displacement what existing residents value is imperiled when innovation driven redevelopment remains accountable to the property market The book first traces the municipal and institutional politics that empowered officials to demolish a predominantly Black neighborhood near the University of Pennsylvania and Drexel University in the late 1960s to make way for the University City Science Center and University City High School It also provides new insight into organizations whose members experimented during that same period with alternative conceptions of economic advancement The book then shifts to the present documenting contemporary efforts to position university adjacent neighborhoods as locations for prosperity built on scientific knowledge Wolf Powers examines the work of mobilized civic groups to push cultural preservation concerns into the public arena and to win policies to help economically insecure families keep a foothold in changing neighborhoods Placing Philadelphia s innovation districts in the context of similar development taking place around the United States University City advocates a reorientation of redevelopment practice around the recognition that despite their negligible worth in real estate terms the time care and energy people invest in their local environments and in one another are precious urban resources Pictured on the book s cover is a luncheon on Melon Street between 37th and 38th Streets in West Philadelphia May 31 2014 The community meal was part of Funeral for a Home a project that honored the life and passing of a house at 3711 Melon Street in Mantua Photo by Jeffrey Stockbridge Funeral for a Home was commissioned by Temple Contemporary Temple University Original support for Funeral for a Home was provided by The Pew Center for Arts Heritage Philadelphia [The Conservative Frontier](#) Jeff Roche,2025-10-07 How West Texas business and culture molded the rise of conservatism in the United States Much of what we understand as modern American political conservatism was born in West Texas where today it predominates How did the people of such a vast region larger than New England and encompassing big cities like Lubbock and Amarillo as well as tiny towns from Anson to Dalhart develop such a uniform political culture And why and how did it go national Jeff Roche finds answers in the history of what he calls cowboy conservatism Political power players matter in this story but so do football coaches newspaper editors and a breakfast cereal tycoon who founded a capitalist utopia The Conservative Frontier follows these and other figures as they promoted an ideology grounded in the entrepreneurial and proto libertarian attitudes of nineteenth century Texas ranchers including a fierce devotion to both individualism and small town notions of community responsibility This political sensibility was in turn popularized by its association with the mythology and iconography of the cowboy as imagined in twentieth century mass media By the 1970s and the rise of Ronald Reagan Roche shows it was clear that the cowboy conservatism of West Texas had set the stage for the emergence of the New Right the more professionalized and tech savvy operation that dominated national conservative politics for the next quarter century **Handbook on Green**

Infrastructure Danielle Sinnett, Nick Smith, Sarah Burgess, 2015-11-27 Green infrastructure encompasses many features in the built environment. It is widely recognised as a valuable resource in our towns and cities and it is therefore crucial to understand, create, protect and manage this resource. This Handbook sets the context for green infrastructure as a means to make urban environments more resilient, sustainable, liveable and equitable. Including state of the art reviews that summarise the existing knowledge as well as research findings, this Handbook provides current evidence for the beneficial impact of green infrastructure on health, environmental quality and the economy. It discusses the planning and design of green infrastructure as a strategic network down to the individual features in a neighbourhood and looks at the process of green infrastructure implementation, emphasising the importance of collaboration across multiple professions and sectors. This comprehensive volume operates at multiple spatial scales from strategic networks at the regional level to individual features in neighbourhoods with international case studies used throughout to illustrate key examples of good practice. This collection of expert contributions will be invaluable to students and academics in the fields of planning, urban studies and geography. Practitioners and policy makers will also find the policy discussion and examples enlightening. **Principles of Water**

Resources Thomas V. Cech, 2018-04-03 Proper management of water resources can take many forms and requires the knowledge and expertise to work at the intersection of mathematics, geology, biology, geography, meteorology, political science and even psychology. This book provides an essential foundation in water management and development concepts and practices, dissecting complex topics into short, understandable explanations that spark true interest in the field. Approaching the study of water resources systematically, the discussion begins with historical perspective before moving on to physical processes, engineering, water chemistry, government regulation, environmental issues, global conflict and more. Now in its fourth edition, this text provides the most current introduction to a field that is becoming ever more critical as climate change begins to threaten water supplies around the world. As geography, climate, population growth and technology collide, effective resource management must include a comprehensive understanding of how these forces intermingle and come to life in the water so critical to us all. **Hiking Alaska**

Contextualizing Angela Davis Joy James,2023-12-28 Angela Davis is iconic as an international figure but few recognize the educational political and ideological contexts that formed the public persona Excavating layers of networks activists academics polemicists and funders across the ideological spectrum Joy James

studies the paradigms and platforms that leveraged Angela Davis into recognition as an activist and radical intellectual. Beginning in Alabama in 1944 with Davis's birthplace and ending in California in 1970 with a surrogate political family, James investigates context in order to better understand the agency and identity of Davis. Her chronology marks key events relevant to Davis: Black communities and the US AntiBlack repression under Jim Crow; Black bourgeois southern families; revolutionaries; elite education; communist parties; international travels; undergrad and graduate schooling; all interconnect and play a part in Davis's rise in stature from persecution as a UC graduate student to the UC Presidential chair some three decades later. Set against the backdrop of 21st century US democracy and the rise of neofascists, James highlights the centrality of those considered ancillary to US liberation movements. She unpacks the contradictions of iconography and revolutionary agency and shows how a triumphal figure from a symbolic era of struggle became the icon of the rare people's victory.
