problems at the tactical and operational level were similar enough to be useful in developing strategic thinking These assumptions resulted in what Samuel P Huntington described as the normal theory relationship between policy makers and generals The assumption made sense for the United States but had one unfortunate result The Army as an institution misread the nature of an apolitical force The essence of an apolitical force should be non partisan Army professionals above political interference or interest There is a difference however between policy and politics While not involving itself in the political life of the nation the Army is vitally concerned with the policies of the nation The discussion strategists must prepare for are political but in the nature of policy as the object of war A historical survey of strategists from General Winfield Scott to General Creighton Abrams suggests that the most successful strategists are life long learners They build holistic understanding of the interdependent and infinite connections of the whole problem Once they develop a hypothesis about the whole problem they reshape those connections to create a better peace for the United States Strategists that take time to understand the whole problem encourage discourse Retaining the Functional Area 59 Strategist program will continue to benefit the force because they do not follow a traditional route to generalship After all few have earned stars by arguing debating and taking intellectual risk
