The Conceptual Evolution of DSM-5 Darrel A. Regier, William E. Narrow, Emily A. Kuhl, David J. Kupfer, American Psychopathological Association, 2010-11-03 There is a need to refine our current psychiatric nosology to produce diagnostic criteria and disorder categories that keep pace with advances in neuroscience while at the same time enhance clinical utility Furthermore dimensional aspects of psychiatric disorders require greater recognition so as to improve our understanding of boundaries between disorders and underscore the heterogeneous nature of psychopathology The Conceptual Evolution of DSM 5 provides a framework for the evolution of the forthcoming diagnostic system in the fifth edition of Diagnostic and Statistical Manual of Mental Disorders DSM 5 which will help advance clinical practice and facilitate ongoing development of diagnostic criteria This manual Highlights recent progress in our understanding of cross cutting factors relevant to psychiatric diagnosis and symptom presentation Includes detailed discussions on the role of factors such as age gender culture and disability in the expression of mental disorders Provides a review of genetic evidence supporting a cross cutting approach to nosology Offers suggestions for integrating cross cutting factors with DSM 5 The Conceptual Evolution of DSM 5 was written to impart a theoretical context for understanding potential revisions to DSM 5 The authors reevaluate the structure of the current manual and discuss cross cutting approaches to facilitate clinical practice and refine research approaches that will guide clinical trials genetics imaging and treatment guidelines The authors provide the following insights Detailed descriptions of age gender and culture specific aspects relevant to psychiatric diagnosis and the need for sensitivity to these factors when making diagnoses Discussions on the dimensional aspects of mental disorders including overlapping symptoms relevant to many or most diagnoses Consideration of alternative classifications of disorders that recognize disorders sharing validating features Presentation of neuroscientific and epidemiologic evidence to expand understanding of disorders beyond that of the categorical organization presented in DSM IV A review of clinical implications including how clinicians may shift their conceptualization of previously reified diagnostic criteria and their consequences As presented to the 99th Annual Meeting of the American Psychopathological Association The Conceptual Evolution of DSM 5 explores the rapidly changing research base for the understanding of neurodevelopmental neurocognitive addictive and other psychiatric disorders The contributions in this volume confirm that DSM 5 is intended to be a living document that can accommodate revisions to specific diagnostic areas based on new evidence that is replicable and subject to review This

efficient updating process will help researchers and clinicians keep abreast of the latest protocols for the research diagnosis and treatment of mental illness

A Research Agenda for DSM-V Diagnostic and Statistical Manual of Mental Disorder
David J. Kupfer, Michael B. First, Darrel A. Regier, 2002

In the ongoing quest to improve our psychiatric diagnostic system we are now searching for new approaches to understanding the etiological and pathophysiological mechanisms that can improve the validity of our diagnoses and the consequent power of our preventive and treatment interventions venturing beyond the current DSM paradigm and DSM IV framework This thought provoking volume produced as a partnership between the American Psychiatric Association the National Institute of Mental Health the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse represents a far reaching attempt to stimulate research and discussion in the field in preparation for the eventual start of the DSM V process still several years hence The book Explores a variety of basic nomenclature issues including the desirability of rating the quality and quantity of information available to support the different disorders in the DSM in order to indicate the disparity of empirical support across the diagnostic system Offers a neuroscience research agenda to guide development of a pathophysiologically based classification for DSM V which reviews genetic brain imaging postmortem and animal model research and includes strategic insights for a new research agenda Presents highlights of recent progress in developmental neuroscience genetics psychology psychopathology and epidemiology using a bioecological perspective to focus on the first two decades of life when rapid changes in behavior emotion and cognition occur Discusses how to address two important gaps in the current DSM IV 1 the categorical method of diagnosing personality disorders and their relationship with Axis I disorders and 2 the limited provision for the diagnosis of relational disorders suggesting a research agenda for personality disorders that considers replacing the current categorical approach with a dimensional classification of personality Reevaluates the relationship between mental disorders and disability asserting that research into disability and impairment would benefit from the diagnosis of mental disorders be uncoupled from a requirement for impairment or disability to foster a more vigorous research agenda on the etiologies courses and treatment of mental disorders as well as disabilities and to avert unintended consequences of delayed diagnosis and treatment Examines the importance of culture in psychopathology and the main cultural variables at play in the diagnostic process stating that training present and future professionals in the need to include cultural factors in the diagnostic process is a logical step in any attempt to develop comprehensive research programs in psychology psychiatry and related disciplines This fascinating work with contributions from an international group of research investigators reaches into the core of psychiatry providing invaluable background and insights for all psychology and psychiatry professionals food for thought and further research that will be relevant for years to come
