Reclaiming the Teaching Discourse in Higher

Education Ian M. Kinchin,2025-02-20 This book examines university teaching to encourage a move away from the singular lens of neoliberalism towards more a pluralistic stance that inspires a healthy diversity of theories and practices University teaching is dominated by neoliberal cultures of measurement consumerism and deficit generating a monocultural narrative that disenfranchises the higher education teaching community Collaborative communities of support are now perceived as performative regimes of surveillance and existing injustices in the education system have been amplified by institutional responses to the COVID 19 pandemic This book offers a reappraisal of the current state of university teaching and re imaginings of potential futures Inspired by emerging perspectives in educational research and building upon Biesta's notion of the rediscovery of teaching the book encourages an escape from accepted wisdom liberating teaching from the bonds of reductive binary and linear thinking and accepting the need for a plurality of theoretical perspectives While universities use popular terms such as student centredness global excellence active learning and so on and will highlight key performance metrics such as student satisfaction or teaching excellence awards the reality is that much current teaching practice is rather traditional teacher centred passive and content heavy Despite managerial emphasis on best practice and evidence based practice teaching is not reducible to a simple set of competencies and student learning is not adequately summarised as a list of graduate attributes Teaching is relational and highly context dependent and our discussion of teaching should recognise this The performative culture pervading many campuses can dampen down large scale innovation leaving marginalised pockets of subversive collaboration and experimentation to operate below the corporate radar Here the contributors give voice to some of those emerging ideas and challenge neoliberal orthodoxy *Flexible Learning in Action* Rachel Hudson,Oates Lyn,Sian Maslin-Prothero,2014-05-12 First Published in 1997 Pressures to find ways of delivering courses to new markets lifelong learners and part time students have all contributed to the growth in finding ways of delivering flexible learning This book provides case studies to illustrate the diversity of approaches and gives advice on good practice The case studies paint a broad picture of flexible learning developments in higher education in the United Kingdom Australia and the United States of America Several trends concerning the introduction of flexible learning have emerged and the contributors examine strategies that have been developed at an institutional or departmental level for supporting flexible learning initiatives [American Universities and Colleges](#) ,2014-10-08 No detailed description available for American Universities
