

GR 10 Paper 1 Life Sciences scope November 2023 (10 November 2023)

Biological terms: Interphase, Anaphase, Metaphase, Telophase, Collenchyma, phloem, Sclerenchyma, Parenchyma, cuticula, Transpirations, stomata, neuron, organic compound, connective tissue, chromatin, chromosome, foramen magnum, axial skeleton, cranium	
Chemistry of life	Cells
Difference between organic and inorganic compounds	Difference between animal cell and plant cell
Examples of organic and inorganic compounds	All the cell organelles and functions/rolls
Monomers of all organic compound	Describe the build of the nucleus, mitochondria, and chloroplast
Elements of all the organic compounds	Investigation: Osmose and diffusion (Look at the apparatus that we use and how to set up this Investigation)
Vitamins A, B, C, D, and E, and there deficiency diseases they can cause	Explain osmose and diffusion
Enzymes	
- Lock and key model	
- Function of enzymes	
Influence of temperature and pH on enzyme action	
Mitosis	Plant tissue
All the phases can identify and give reasons for your answers	Build and function of: Collenchyma, Sclerenchyma, Parenchyma, Phloem, Xylem and stomata
Product of Mitosis	Definition of tissue
Difference between telophase in plant cells and animal cells	
Biological importance of Mitosis	
Cancer: - Uncontrolled cell division and growth: Causes and treatment of cancer	
	Function and build of: Stomata, Xylem, and root hair
	Adaptions of Xylem for movement of water upwards
Animal tissue	Plant organs
Name and identify all the animal tissues and where in the human body are they located.	The labels and functions of the dorsiventral leaf.
	Adaptions of the different parts of the leaf
Functions of all the animal tissues	Definition of an organ
Name all the connective tissues	
Support and transport in plants	Support in animals
Labels of dicotyledonous stem and root	All the labels of the skeleton
Difference between a dicotyledons root and stem	Where do we find long bones in the skeleton
	Function of the skeleton
Investigation: The rate of transpirations (Potometer)	
The effect of environmental factors on transpiration (Wind, Temperature and Light.)

Scope Of Life Science November 2014:

Towards an embodied science of intersubjectivity: Widening the scope of social understanding research Ezequiel Di Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition. This problem is understood as how we figure out other minds relying only on indirect manifestations of other people's intentional states which are assumed to be hidden, private and internal. Research on this question has mostly investigated how individual cognitive mechanisms achieve this task. A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes. This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed. Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds. These phenomena include acting and perceiving together, verbal and non-verbal engagement, experiences of disconnection, management of relations in a group, joint meaning making, intimacy, trust, conflict, negotiation, asymmetric relations, material mediation of social interaction, collective action, contextual engagement with socio-cultural norms, structures and roles etc. These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research. We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena. This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity, the social mind writ large. To contribute to this goal we encouraged contributions in psychology, neuroscience, psychopathology, philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive, from observational to participatory.

Art and Future Peter Stupples, Jane Venis, 2018-04-18 This selection of essays examines the future of art in a changing world. In particular, contributors discuss the agency of art in conditions of ecological threats to the natural world, to climate change and the effects of globalisation, neoliberal economics and mass tourism. Following the lead of Chicago-based Frances Whitehead whose essay is a key text, some contributors take positions on working with local government agencies to embed art thinking within development projects going back to the art thinking at the centre of Kazimir Malevich's work in Vitebsk one hundred years ago in Russia. Other papers highlight small-scale art interventions that bring ecological issues to public notice and suggest positive responses whilst others discuss large-scale problems brought about by the social, economic and laissez-faire history of the emerging Anthropocene with possible dystopic outcomes.

Religious Perspectives on Social Responsibility in Health Joseph Tham, Chris Durante, Alberto García Gómez, 2018-04-26 This book discusses the meaning and implications of the social and ethical implications of the notion of

social responsibility in healthcare in six major world religions Buddhism Christianity Confucianism Hinduism Islam Judaism This collection of papers is based on a four day workshop where bioethics experts from various religious traditions gathered They discussed the ways in which their respective traditions could or could not uphold the tenets of Article 14 of UNESCO s Universal Declaration of bioethics and Human Rights The different papers presented in this book are based on this interchange of ideas at the workshop The book explores the potential points of convergence among the various perspectives presented as well as a discussion on the ways in which their moral differences may be managed The managing of these moral differences through international socio ethical mechanisms contributes significantly to the UNESCO Universal Declaration of Bioethics and Human Rights goal of simultaneously respecting religio cultural pluralism while upholding a commitment to human rights

Learning Under the Lens Annemaree Carroll,Ross Cunningham,Annita Nugent,2020-12-01 *Learning Under the Lens* Applying Findings from the Science of Learning to the Classroom highlights the innovative approach being undertaken by researchers from the disparate fields of neuroscience education and psychology working together to gain a better understanding of how we learn and its potential to impact student learning outcomes The book is structured in four parts Science of learning a policy perspective sets the scene for this emerging field of research Self regulation of learning and Technology and learning feature findings by eminent international and national researchers in the field and provides an insight into some of the innovative research illustrating the depth breadth and multi disciplinarity of the research and Research translation focuses on the scaled up implementation of research findings in authentic learning settings and showcases research findings which are having impact in learning environments This fascinating book is intended as a reference tool to create awareness among researchers policy makers and education practitioners of the research being undertaken in the science of learning field and its potential to impact student learning outcomes

New Medicalism and the Mental Health Act John Fanning, 2018-08-09 Ten years have passed since the Mental Health Act MHA 2007 came into force in England. An amending statute the Act reformed the MHA 1983 and reshaped the law governing the compulsory care and treatment of people suffering from mental disorders. Primarily driven by concerns about risk it sought to remove legalistic obstacles to civil commitment and extend the law's coercive reach into the community. At the time of its introduction the 2007 Act was written off as a retrograde step and a missed opportunity for radical rights focused reform. Despite this little attention has been paid to its impact in the years since. Published to coincide with the tenth anniversary of the 2007 Act this book offers a timely evaluation of mental health law and policy in England. It argues that the current MHA defies easy categorisation within any of the descriptive models which have customarily narrated the mechanics of civil commitment namely legalism new legalism and medicalism. It therefore makes the case for a new model new medicalism to account for the 2007 Act's enhancement of the discretion of mental health professionals for the express purposes of facilitating the management of situations of risk. In doing so the book critically examines the problems inherent in civil commitment frameworks organised around the concept of risk explores the theoretical foundations of new medicalism considers the challenges facing proponents of future reform in the era of the UN Convention on the Rights of Persons with Disabilities and reflects on the 2007 Act's practical impact.

Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
