

Pumping System Assessment Tool User's Manual

PSAT2008

Don Casada, Diagnostic Solutions, LLC

About this manual

The Pumping System Assessment Tool (PSAT) is designed to allow users to evaluate the potential energy savings opportunities of pumping systems based on field-measured data. This user's guide document gives basic information about the data entry items, the calculated results, and assorted control button features. It is not intended to provide a tutorial on how to obtain field data or perform pumping system evaluations. The U.S. Department of Energy sponsors both end-user and specialist workshops on those subjects. International affiliates are also undertaking similar efforts. A listing of currently planned training sessions is available on the web at:

<http://www1.eere.energy.gov/industry/bestpractices/training.html>

Support from the U.S. Department of Energy

The U.S. Department of Energy supports the operation of the EERE Information Center at:

http://www1.eere.energy.gov/industry/bestpractices/info_center.html

Users may call (1-877-337-3463) or e-mail (eeinfo@ee.doe.gov) the EERE Information Center with questions about program operation or technical questions related pumping system operating efficiency.

Manual organization

This manual is organized by general section of the main and supporting panels. Following an overview, each section is covered, with descriptions of the individual control or indication items within that section. Links to the overview and sections are provided below.
