BANK Question and Answers Latest

Chapter 1

1. The nurse consults the DSM for which of the following purposes?

- A) To devise a plan of care for a newly admitted client
- B) To predict the client's prognosis of treatment outcomes
- C) To document the appropriate diagnostic code in the client's medical record
- D) To serve as a guide for client assessment

Ans: D

Feedback:

The DSM provides standard nomenclature, presents defining characteristics, and identifies underlying causes of mental disorders. It does not provide care plans or prognostic outcomes of treatment. Diagnosis of mental illness is not within the generalist RN's scope of practice, so documenting the code in the medical record would be inappropriate.

2. Which would be a reason for a student nurse to use the DSM?

- A) Identifying the medical diagnosis
- B) Treat clients
- C) Evaluate treatments
- D) Understand the reason for the admission and the nature of psychiatric illnesses.

Ans: D
