Handbook of Primary Care Psychology Leonard

J. Haas, 2004-08-19 This handbook is designed to provide authoritative information to the psychologist working in primary care settings and to those seeking to learn about clinical issues in such settings. Scholarly and at the same time practical, this volume offers both the clinician and the researcher a wide-ranging look at the contexts in which psychological services become of paramount importance to the health of the patient. The handbook will cover the prevalent psychological conditions in the primary care setting: depression, anxiety, somatization, eating disorders, and alcoholism; illnesses in which psychological disorders play a major role, such as heart disease, diabetes, cancer, pain management, headache, asthma, low back pain, sleep disorders, among others; and issues of concern to psychologists treating children: ADHD, disciplinary problems, etc. Treating women: abuse, infertility, menopause, sexual dysfunction; treating men: workaholic, alcoholism, sexual dysfunction; and treating the older patient: death and dying, cognitive impairment, late life depression. Other important topics include psychological side effects of common medications, resistance to treatment, spiritual concerns in the treatment of patients, cultural differences in healing, suicide, AIDS, prevention of disease, and many others. Leonard Haas is a noted authority in the area of primary care psychology and has recruited expert contributors for the 41 chapters and two appendices that make up this definitive handbook for a growing and important subspecialty in clinical psychology. The work may also be used in graduate courses in health psychology.

Advanced Practice Psychiatric Nursing

Kathleen Tusaie, Joyce J. Fitzpatrick, 2022-01-29 This textbook is our go-to book; it is an excellent overview of advanced practice in psychiatric nursing. This is the text that we use in our seminar courses during clinical, and we also use it in our review for our ANCC boards. Our students' scores were 92% this past year. We are very pleased with this textbook. Dr. Cheryl Zauderer, PhD, CNM, PMHNP, BC, Associate Dean of Graduate Programs, Co-Coordinator, PMHNP Program, Hunter-Bellevue School of Nursing. Now in its third edition, this revised reference continues to serve as the only foundational resource for APRNs to incorporate a focus on integrative interventions with mental health issues across the lifespan. New chapters on Legal and Ethical Decision Making and LGBTQ Issues: Care of Sexual and Gender Minority Patients and Increasing Resilience in Advanced Practice Mental Health Nurses shed light on vital contemporary issues. This text offers expanded coverage on telehealth, population health, and the updated AACN Essentials. Additionally, the third edition provides 10 practical case studies illustrating specific syndromes, as well as 2019 updates to the ANCC certification exam. It provides expanded instructor resources, including a Test Bank and PowerPoints. Comprehensive and practical, this text is organized around commonly seen clinical constellations of psychiatric symptoms and covers neurobiology, theory, and research evidence, along with pharmacological information relevant to each syndrome. It delivers an abundance of valuable interventions from which clinicians and clients can co-create the most effective individualized interventions. Popular decision trees provide an algorithm to help students work through the process of evaluating and treating patients, and a lifespan focus prepares students for treating patients in all age groups.
