**Blood Double** Neil McMahon,2010-12-14 From the very start Dr Carroll Monks knew that the businessman dumped from a limousine in the parking lot of Mercy Hospital wasn't a typical San Francisco junkie Even after Monks had rushed the dying man inside and brought him back from the precipice of a heroin overdose after the danger had seemingly passed Monks sensed that something more sinister was brewing Just how sinister he couldn't have guessed First a phalanx of lawyers and doctors descended on the hospital and whisked the man away before Monks could find out more about the suspicious circumstances surrounding his arrival Then a small fire broke out in the hospital an act of sabotage that resulted in the disappearance of the man's blood samples But the real shock came the next morning when the newspapers reported the mysterious disappearance of billionaire Lex Rittenour Rittenour a beloved computer wunderkind had long been rumored to be developing a top secret technology involving the human genome the medical applications of which had the potential to place his name alongside those of Lister Curie and Salk Now just days before the unveiling of his breakthrough Rittenour whom Monks now recognizes as the man he saved in the ER the night before had according to his corporate spokesmen gone into seclusion What begins for Monks as an inquiry into Rittenour's disappearance unearths something far more diabolical the horrific facts behind genetic research done in Rittenour's name and pits him against a corporation of dubious ethics ruthless commando style tactics and a multi billion dollar motivation to protect its dark secrets As he did in his first Carroll Monks novel *Twice Dying* Neil McMahon creates from today's most complex ethical issues in this case the progress stemming from explosive new advances in genetics the unforgettably chilling electrifying drama of *Blood Double*
