Educational Binds of Poverty Ceri Brown, 2014-12-17 Shortlisted for BBC Radio 4's Thinking Allowed's second Ethnography Awards in partnership with the British Sociological Association *Educational Binds of Poverty* tackles the assumptions made by many recent social and educational policy initiatives suggesting that the best way to improve educational prospects of children in poverty is through an increased emphasis upon a culture of control discipline regulation and accountability In this book Ceri Brown presents these assumptions against a review of the research literature and an original ethnographic longitudinal study into the lives of children in poverty in order to highlight the gap between policy discourses and the lived experiences of children themselves Through the theoretical concept of a set of binds against educational success the book explores four key areas that children in poverty have to navigate if they are to be successful in school These are material deprivation the cultural contexts of school home and the community friendship and social capital the effects of student mobility through atypical school changes In seeking to characterise and explain what life is like for young school children this book questions why policy makers have a radically different frame of reference in purporting to understand how their policies will change the behaviour of those living in poverty This leads onto a consideration of what lessons may be learned in order to contribute towards a more appropriate policy agenda that attends to the multiple binds that children in poverty have to negotiate

Monitoring the Quality of Education in Schools

Vanessa Scherman, Roel J. Bosker, Sarah J. Howie, 2016-12-27 The monitoring of quality has been part of the educational landscape for many decades Originally the need to monitor arose as part of an economic process whereby policy makers wanted to discern the return on investment in education This bottom line thinking while still prominent has receded into the background in light of global changes and the emergence of a global economy Now in addition to the question what is the return on investment the more important question is are the students in schools ready to participate in the economy of a 21st century society This is underpinned by the inquiry into what knowledge and competencies are required for students to participate meaningfully in nation building This inquiry can only be undertaken by means of monitoring evaluating where the students are and what is required so that students reach their potential In an ever changing technologically oriented world the manner in which competencies and knowledge are identified and how these need to be measured and identified is important In this book the theory and practice of underpinning the monitoring of the quality of education is described This is followed by a number of practical examples in the form of country case studies on how theory plays out in practice The book further provides common themes across developed and developing emerging economies underscoring the need for approaches which are locally relevant but internationally transferable [Educating Tomorrow's Engineers](#) Great Britain: Parliament: House of Commons: Science and Technology Committee, 2013-02-08 In the UK we teach young people to become computer users and consumers rather than programmers and software engineers This is creating a chronic skills gap in ICT We need around 82 000 engineers and technicians just to deal with retirements up to 2016 and 830 000 SET professionals by 2020 On the plus side the Government's proposal to include computer science as a fourth science option to count towards the EBac is welcomed The Committee also welcomes the EBac's focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology D T might be marginalised A Technical Baccalaureate TechBac is being designed but if it is to be a success schools should be incentivised to focus on the TechBac by making it equivalent to the EBac Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma a qualification highly regarded would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs The Engineering Diploma however is currently being redesigned as four separate qualifications The Committee also expressed concerns over the Department for Education's DfE lack of clarity on its research budget and use of evidence in decision making The DfE needs to place greater focus on gathering evidence before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change The possibility of gathering evidence from randomised controlled trials RCTs should be seriously considered *The Primary Curriculum* Patricia Driscoll, Andrew Lambirth, Judith Roden, 2011-08-12 Lecturers why waste time waiting for the post to arrive Request and receive your e inspection copy today Providing an overview of the knowledge skills and understanding needed to teach the primary curriculum this book offers an informed critical approach to the teaching of core

and foundation subjects in primary education Underpinned by contemporary research and current policy The Primary Curriculum combines coverage of key subject specific issues with relevant pedagogical approaches to teaching offering a comprehensive overview of each major subject of primary education Particular emphasis is placed on cross curricular and creative approaches to teaching intelligently across different subject areas within the current curriculum framework Curriculum progression from Foundation Stage through to Key Stage 2 is also emphasised The Primary Curriculum is an essential companion for all students on primary initial teacher education courses Patricia Driscoll and Judith Roden are established primary education authors and teach on initial teacher education courses at Canterbury Christ Church University Andrew Lambirth is Professor of Education at University of Greenwich Primary Science Mick Dunne, Alan Peacock, 2011-11-11 What is science What is good science education How can science be intelligently linked to the wider primary curriculum Becoming a confident and informed teacher of primary science requires a strong understanding of the key practical conceptual and pedagogical issues that underpin science education in the primary school Touching on current curriculum concerns and the wider challenges of developing good practice in science education Primary Science provides an indispensable overview of important areas of teaching every aspiring primary school teacher needs to understand Written directly for initial teacher education students this textbook supports classroom practice and provides a broad survey of key aspects of primary science teaching including the role of science in the curriculum communication and literacy in science teaching science outside the classroom transitional issues and assessment This is essential reading for all students studying primary science on primary initial teacher education courses including undergraduate BEd BA with QTS postgraduate PGCE SCITT and employment based routes into teaching and also NQTs Mick Dunne is Head of Initial Teacher Training at Bradford College Alan Peacock is Honorary Research Fellow at the University of Exeter
