 Gary Clyde Hufbauer, Kati Suominen, 2010-10-19 History has declared globalization the winner of the 20th century
 Globalization connected the world and created wealth unimaginable in the wake of the Second World War But the financial

 crisis gave new fuel to the skeptics of the benefits of economic integration Policy responses seem to favor anti globalizers

Southern Pines ,2001 To satisfy the increasing demand for forest products much of the future timber supply will be from
 improved trees grown on managed plantations This fast grown resource will tend to be harvested in short age rotations and
 will contain higher proportions of juvenile wood than that of current harvests In anticipation of this resource definitive
 information is needed on the influence of juvenile wood on lumber properties so that grading rules and the associated
 allowable design stresses can be modified as needed This document reports the results of an extensive review of the
 literature on juvenile wood in southern pines This report defines and discusses the extent occurrence and characteristics of
 juvenile wood It reviews the effects that environment and silviculture have on the amount of juvenile wood produced Finally
 the impacts that juvenile wood has on mechanical properties were quantified The results of this quantification are significant
 to all producers of fast grown plantations Research has clearly shown that juvenile wood will have a detrimental impact on
 allowable design stresses for visually graded lumber It is critical that methods are developed to more carefully manage fast
 grown plantation wood for its most efficient use This review should serve as an overall collection of knowledge pertaining to
 juvenile wood research in southern pines and should help in the decision making efforts to improve seedling selection
 techniques and silvicultural practices to maximize the potential for fast grown plantations of southern pines *General*
