How America Stacks Up Edward Alden, Rebecca Strauss, 2016-02-01. American leadership in the world is built on the foundation of its economic strength. Yet the United States faces enormous economic competition abroad and threats to its economy at home. In How America Stacks Up: Economic Competitiveness and U.S. Policy, Edward Alden, Bernard L. Schwartz, senior fellow at the Council on Foreign Relations and director of the Renewing America initiative, and Rebecca Strauss, associate director of Renewing America, focus on those areas of economic policy that are the most important for reinforcing America's competitive strengths: covering education, transportation, trade and investment, corporate tax, worker retraining, regulation, debt and deficits, and innovation. How America Stacks Up shows how in a highly competitive global economy these seemingly domestic issues are all crucial to U.S. success in the global economy. The line between domestic economic policy and foreign economic policy is now almost invisible and getting these policies right matters for more than just U.S. living standards. The United States' ability to influence world events rests on a robust competitive economy. But without further investment in education, infrastructure and innovation, Alden and Strauss show the United States runs the risk of endangering its greatest competitive advantage. Through insightful analysis and engaging graphics, How America Stacks Up outlines the challenges faced by the United States and prescribes solutions that will ensure a healthy competitive U.S. economy for years to come.

Heywood,2022-06-01 The intention of this book is to demonstrate that curriculum design is a profoundly philosophical exercise that stems from perceptions of the mission of higher education Since the curriculum is the formal mechanism through which intended aims are achieved philosophy has a profound role to play in the determination of aims It is argued that the curriculum is far more than a list of subjects and syllabi or that it is the addition and subtraction of items from a syllabus or whether this subject should be added and that subject taken away This book explores how curricular aims and objectives are developed by re examining the curriculum of higher education and how it is structured in the light of its increasing costs rapidly changing technology and the utilitarian philosophy that currently governs the direction of higher education It is concluded that higher education should be a preparation for and continuing support for life and work a consequence of which is that it has to equip graduates with skill in independent learning and its planning and reflective practice A transdisciplinary curriculum with technology at its core is deduced that serves the four realities of the person the job technology and society

Encyclopedia of Education Economics and Finance Dominic J. Brewer, Lawrence O. Picus, 2014-08-25 Economics can be a lens for understanding the behavior of schools, districts, states and nations in meeting education needs of their populations as well as for understanding the individual decisions made by administrators, teachers and students.
