recently to criticize the postapartheid government's failures to deliver on some of its promises. Rather than promoting one particular policy solution, this book argues that poverty knowledge teaches us about the dynamics of historical change, the power of racism in white settler societies, and the role of grassroots protest movements in shaping state policies and scientific categories. Readers will gain new perspectives on today's debates about social welfare redistribution and human rights and will ultimately find reasons to rethink conventional approaches to advocacy.

Wars of Latin America, 1899-1941 René De La Pedraja, 2015-11-16. The years 1899 through 1941 are remarkable even by Latin America's uniquely turbulent standards. During this time, border disputes and domestic insurrections forcefully shaped the history of this area as many countries made the rocky transition from agrarian to industrial societies. This volume provides a concise survey of Latin American wars between 1899 and 1941. It compares and contrasts the wars and considers them in light of military theory. It also demonstrates how instrumental wars have been in directing the history of Latin America and how the United States has often influenced these wars in a decisive manner. Wars examined include border disputes in Peru, Bolivia, Ecuador, Panama, and Costa Rica, and domestic insurrections in Colombia, Cuba, Mexico, and Nicaragua. Numerous photographs and maps illustrate the text and make it easy to follow every military campaign. The vivid narrative captures the human drama of the wars and brings to life the violent clashes of powerful personalities in unusually hostile terrain. Jungles, mountains, and deserts ravaged armies no less dramatically than combat, and the emotions the wars released make many episodes unforgettable. Sedimentology of Paralic Reservoirs G.J. Hampson, A.D. Reynolds, B. Kostic, M.R. Wells, 2017-07-20. Paralic reservoirs reflect a range of depositional environments including deltas, shoreline shelf systems, and estuaries. They provide the backbone of production in many mature basins and contribute significantly to global conventional hydrocarbon production. However, the range of environments, together with relative sea level and sediment supply changes, result in significant variability in their stratigraphic architecture and sedimentological heterogeneity, which translates into complex patterns of reservoir distribution and production that are challenging to predict, optimize, and manage. This volume presents new research and developments in established approaches to the exploration and production of paralic reservoirs. The 13 papers in the volume are grouped into three thematic sections which address the sedimentological characterization of paralic reservoirs using subsurface data, lithological heterogeneity in paralic depositional systems arising from the influence of tidal currents, and paralic reservoir analogue studies of modern sediments and ancient outcrops. The volume demonstrates that heterogeneity in paralic reservoirs is increasingly well understood at all scales but highlights gaps in our knowledge and areas of current research.
