The Faro Convention's role in a changing society Francesc Pla, Jovana Poznan, 2022-01-05 Council of Europe

action in the field of cultural heritage targets promoting diversity and dialogue through access to heritage to foster a sense of identity collective memory and mutual understanding within and between communities. The year 2021 marks the 10th anniversary of the entry into force of the Framework Convention on the Value of Cultural Heritage for Society also known as the Faro Convention. The present publication shows that what emerged back in 2005 as a truly innovative approach is still relevant today and can also have an impact on issues beyond its traditional realm. This is illustrated through a set of articles that demonstrate the pertinence of the Faro Convention's approach to cultural heritage in addressing different aspects ranging from democratic participation to tourism rethinking. The wide range of topics addressed and the numerous possibilities described by the various contributors suggest that the next ten years of the Faro Convention will be as challenging and rewarding as the decade that has elapsed since its entry into force.

Applied human rights Bart Wernaart, 2023-08-14

What do human rights look like when we present them as action based bottom up concepts and not exclusively as legal items? After all when we narrow down human rights to a legal concept only we do not do justice to its meaning. In many professions and branches the idea of human rights is used in jargon as guiding principles and as a source of inspiration. Human rights make a difference albeit not necessarily as an enforceable legal concept. This facet of human rights its practical application beyond lawmakers and lawyers is deeply underexplored and deserves much more attention. Applied human rights are not per se a matter of lawmaking and enforcement only it can be part of a mission and vision of companies it is sometimes at the core of artistic work it can be a leading principle in social work especially considering the rights of the child and it is used as a guiding principle in technological innovation. Human rights are not just for lawyers but also for managers engineers social workers musicians local governments law enforcers designers and business people. However and not surprisingly in each branch the impact and implications of human rights differ. Therefore it is time for a comprehensive textbook in which the idea of human rights is not exclusively explored as a legal concept but instead discussed from various applied perspectives. In this book we explore human rights as an applied concept as something we do. The chapters are written by an international group of leading experts in a wide range of disciplines and themes including technology development social studies pedagogy business strategy public governance the arts philosophy and law.
