6th European Conference of the International Federation for Medical and Biological Engineering Igor Lacković, Darko Vasic, 2014-09-02 This volume presents the Proceedings of the 6th European Conference of the International Federation for Medical and Biological Engineering MBEC2014 held in Dubrovnik September 7 11 2014 The general theme of MBEC 2014 is Towards new horizons in biomedical engineering The scientific discussions in these conference proceedings include the following themes Biomedical Signal Processing Biomedical Imaging and Image Processing Biosensors and Bioinstrumentation Bio Micro Nano Technologies Biomaterials Biomechanics Robotics and Minimally Invasive Surgery Cardiovascular Respiratory and Endocrine Systems Engineering Neural and Rehabilitation Engineering Molecular Cellular and Tissue Engineering Bioinformatics and Computational Biology Clinical Engineering and Health Technology Assessment Health Informatics E Health and Telemedicine Biomedical Engineering Education Structural Health Monitoring and Integrity Management Keqin Ding, Shenfang Yuan, Zhishen Wu, 2015-05-29 Structural Health Monitoring and Integrity Management is a collection of the papers presented at the 2nd International Conference of Structural Health Monitoring and Integrity Management ICSHMIM2014 Nanjing China 24 26 September 2014 and addresses the most recent developments in the field of Structural Health Monitoring SHM and integrity ma *Nuclear Science Abstracts*, 1976-04 Cerebral endothelial and glial cells are more than bricks in the Great Wall of the brain: insights into the way the blood-brain barrier actually works (Celebrating the centenary of Goldman's experiments) Elena García-Martín, George E. Barreto, José A. G. Agúndez, Rubem C. A. Guedes, Ramon Santos El-Bachá, 2015-07-02 When Ehrlich discovered the first evidence of the blood brain barrier in 1885 he probably did not perceive the Great Wall that remained hidden from consciousness inside the central nervous system Ehrlich had observed that acidic vital dyes did not stain the brain if they were injected into the blood stream A century ago 1913 Goldman showed that the injection of trypan blue in the cerebrospinal fluid stained only the brain but not the other organs For almost a century it was thought that the blood brain barrier BBB consisted in a physical barrier resulting from the restricted permeability of the cerebral endothelial cell layer as they are joined by tight junctions However as scientists are always looking for news in what is already discovered in the end of the 20th century we had evidences that cerebral endothelial and glial cells express several drug metabolizing enzymes consisting in a second protection system a metabolic barrier Furthermore the drugs and their metabolites must overcome the activity of several multidrug resistance proteins that function as ATP dependent efflux pumps consisting in the third line of defence the active barrier Therefore the way the BBB actually works should be better explained Several endogenous compounds as well as xenobiotics may be activated by enzymes of the metabolic barrier generating reactive oxygen species that could damage neurons Therefore endothelial and glial cells possess endogenous protecting compounds and enzymes against oxidants consisting in an antioxidant barrier When all these systems fail glial cells mainly microglia secrete cytokines in an attempt to crosstalk with defence cells asking

for help which consists in an immune barrier In cerebral regions that are devoid of the physical barrier such as circumventricular organs the metabolic active antioxidant and immune barriers are reinforced It is important to understand how cells involved in the BBB interact with one another and the dynamic mechanisms of their functions This Research Topic published in this e Book considers recent highlights in BBB structure cell and molecular biology biotransformation physiology pathology pharmacology immunology and how these basic knowledges can be applied in drug discovery and clinical researches rewriting what is already written and paving the way that goes to the Great Wall in the Frontiers of the Brain in this new century that is just beginning

From Hysteria to Hormones Amy Koerber, 2018-03-15 In *From Hysteria to Hormones* Amy Koerber examines the rhetorical activity that preceded the early twentieth century emergence of the word hormone and the impact of this word on expert understandings of women s health Shortly after Ernest Henry Starling coined the term hormone in 1905 hormones began to provide a chemical explanation for bodily phenomena that were previously understood in terms of wandering wombs humors energies and balance In this study Koerber posits that the discovery of hormones was not so much a revolution as an exigency that required old ways of thinking to be twisted reshaped and transformed to fit more scientific turn of the century expectations of medical practices She engages with texts from a wide array of medical and social scientific subdisciplines with material from medical archives including patient charts handwritten notes and photographs from the Salpêtrière Hospital where Dr Jean Charcot treated hundreds of hysteria patients in the late nineteenth century and with current rhetorical theoretical approaches to the study of health and medicine In doing so Koerber shows that the boundary between older nonscientific ways of understanding women s bodies and newer scientific understandings is much murkier than we might expect A clarifying examination of how the term hormones preserves key concepts that have framed our understanding of women s bodies from ancient times to the present this innovative book illuminates the ways in which the words we use today to discuss female reproductive health aren t nearly as scientifically accurate or socially progressive as believed Scholars of rhetoric gender studies and women s health will find Koerber s work provocative and valuable

Remote Sensing and Image Processing in Mineralogy Maged Marghany, 2022-03-02 Remote Sensing and Image

Processing in Mineralogy reveals the critical tools required to comprehend the latest technology surrounding the remote sensing imaging of mineralogy oil and gas explorations It particularly focusses on multispectral hyperspectral and microwave radar as the foremost sources to understand analyze and apply concepts in the field of mineralogy Filling the gap between modern physics quantum theory and image processing applications of remote sensing imaging of geological features mineralogy oil and gas explorations this reference is packed with technical details associated with the potentiality of multispectral hyperspectral and synthetic aperture radar SAR The book also includes key methods needed to extract the value added information necessary such as lineaments gold and copper minings This book also reveals novel speculation of quantum spectral mineral signature identifications named as quantized Marghany s mineral spectral or Marghany Quantum Spectral Algorithms for Mineral identifications MQSA Rounding out with practical simulations of 4 D open pit mining identification and monitoring using the hologram radar interferometry technique this book brings an effective new source of technology and applications for today s mineralogy and petroleum engineers Key Features Helps develop new algorithms for retrieving mineral mining potential zones in remote sensing data Solves specific problems surrounding the spectral signature libraries of different minerals in multispectral and hyperspectral data Includes over 200 equations that illustrate how to follow examples in the book
