Nuclear Science Abstracts ,1963 *How We Teach Science* John L. Rudolph,2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public **Science Teaching in Schools** Great Britain: Parliament: House of Lords: Science and Technology Committee,2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools **Sustainability Matters: Environmental Management In The Anthropocene** Lin Heng Lye,Harvey Neo,Sekhar Narayana Kondepudi,Wen Shan Yew,Judy Gek-khim Sng,2017-08-11 Sustainability Matters is a compilation of some of the best research papers submitted by students from the National University of Singapore's multi disciplinary and inter disciplinary graduate programme in environmental studies as their MSc dissertations in Environmental Management MEM This collection is for the period 2014-2015 to 2015-2016 Entitled Sustainability Matters Environmental Management in the Anthropocene this is the sixth volume in the series and comprises 15 of the best research papers completed during this period The papers have been edited for brevity They analyse the many challenges to effective environmental management covering countries including China Vietnam Singapore Indonesia Pakistan Bangladesh the EU and USA Issues examined include biodiversity conservation environmental science environmental governance and management energy and urban studies The first compilation Sustainability Matters Environmental Management in Asia was published in 2010 and comprised the best papers from 2001-2002 to 2006-2007 The second Sustainability Matters Challenges and Opportunities in Environmental Management in Asia was published in 2011 and comprised the best papers from 2007-2008 and 2008-2009 The third and fourth compilations Sustainability Matters Asia's Green Challenges and Sustainability Matters Asia's Energy Concerns Green Policies and
