With step by step guidance and one stop expertise this is the book every scientist science writer and practitioner needs to approach the Wild West of the Web with knowledge and confidence **ICONS 2020** Arif Zainudin ,Yoga Prihatin,Suyono ,Purwo Susongko,Taufiqullah ,2021-01-26 Proceedings of the First International Conference on Social Science Humanities Education and Society Development ICONS 2020 30 November 2020 Tegal Central Java Indonesia ICONS is an International Conference hosted by Universitas Pancasakti Tegal This Conference is arranged to become an annual conference making room for scholars and practitioners in the area of economic socio cultural legal educational environmental aspects as well as a combination of all these aspects *Excellent Teaching* Bettina Jansen-Schulz,Till Tantau,2018-10-12 Die Frage wie die Lehre an Hochschulen zu Exzellenz verbessert werden kann beantworten die Autorinnen und Autoren des Sammelbands aus vier Perspektiven Sie betrachten Herausforderungen f r die Steuerung der Organisation Hochschule und diskutieren aktuelle Forschungsentwicklungen insbesondere anhand der Methode Scholarship of Teaching and Learning Au erdem werden gute Beispiele aus der Lehrpraxis pr sentiert und Ans tze vorgestellt um exzellente Lehre sichtbar zu machen Der Band richtet sich an Akteurinnen und Akteure aus der Lehr und Hochschulentwicklung *Decentralisation and Regional Development* Eva Dick,Karin Gaesing,Daniel Inkoom,Teodoro Kausel,2016-06-15 This book analyzes decentralisation regional development paths and success factors in different governance sectors in Ghana the Philippines Tanzania and Chile and discuss overarching aspects of relevance Decentralisation which refers to the delegation of administrative responsibilities political decision making and fiscal powers to lower levels of government is now considered one of the most efficient engines of development In Sub Saharan Africa decentralised states have made more progress in reducing poverty than those states with lower decentralisation scores But in many countries decentralisation is still considered a work in progress with unsatisfactory results From a spatial point of view the link between decentralisation and regional and district development is particularly interesting Both in the North and in the South regional or district development is seen as holding the potential for advancing social and economic development and even more so in decentralised political settings Space based networks at the regional or district level are considered instrumental for responding to locally specific challenges e g in areas lagging behind economically Big Data, Algorithms and Food Safety Salvatore Sapienza,2022-10-20 This book identifies the principles that should be applied when processing Big Data in the context of food safety risk assessments Food safety is a critical goal in the protection of individuals right to health and the flourishing of the food and feed market Big Data is fostering new applications capable of enhancing the accuracy of food safety risk assessments An extraordinary amount of information is analysed to detect the existence or predict the likelihood of future risks also by means of machine learning algorithms Big Data and novel analysis techniques are topics of growing interest for food safety agencies including the European Food Safety Authority EFSA This wealth of information brings with it both opportunities and risks concerning the extraction of meaningful inferences from data However conflicting interests and tensions among the parties involved are hindering efforts

to find shared methods for steering the processing of Big Data in a sound transparent and trustworthy way While consumers call for more transparency food business operators tend to be reluctant to share informational assets This has resulted in a considerable lack of trust in the EU food safety system A recent legislative reform supported by new legal cases aims to restore confidence in the risk analysis system by reshaping the meaning of data ownership in this domain While this regulatory approach is being established breakthrough analytics techniques are encouraging thinking about the next steps in managing food safety data in the age of machine learning The book focuses on two core topics data ownership and data governance by evaluating how the regulatory framework addresses the challenges raised by Big Data and its analysis in an applied significant and overlooked domain To do so it adopts an interdisciplinary approach that considers both the technological advances and the policy tools adopted in the European Union while also assuming an ethical perspective when exploring potential solutions The conclusion puts forward a proposal an ethical blueprint for identifying the principles Security Accountability Fairness Explainability Transparency and Privacy to be observed when processing Big Data for food safety purposes including by means of machine learning Possible implementations are then discussed also in connection with two recent legislative proposals namely the Data Governance Act and the Artificial Intelligence Act

Manufactured Crisis James Simpson,2024-09-24 Few could have imagined

ten years ago where we'd be in America today. We are confronted on all sides by interminable crises that threaten the very fabric of our nation: from a border flooded with millions of migrants from all over the world to a fentanyl crisis killing more American youths every year than the past three wars combined. Radical transgender activism and other cultural insanity has pushed more youths to commit suicide than at any other time in history. It seems as though the world is rapidly coming unglued. But it is actually a diabolical plan that has been operating for over a hundred years and is now showing its face. This book describes this plan in excruciating detail and shows us a path out if we're willing to take it.
