Chi-Hua Chen, 2022-02-15 The pervasiveness of computers in every field of science industry and everyday life has meant that applied mathematics particularly in relation to modeling and simulation has become ever more important in recent years This book presents the proceedings of the 2021 International Conference on Applied Mathematics Modeling and Computer Simulation AMMCS 2021 hosted in Wuhan China and held as a virtual event from 13 to 14 November 2021 The aim of the conference is to foster the knowledge and understanding of recent advances across the broad fields of applied mathematics modeling and computer simulation and it provides an annual platform for scholars and researchers to communicate important recent developments in their areas of specialization to colleagues and other scientists in related disciplines This year more than 150 participants were able to exchange knowledge and discuss recent developments via the conference The book contains 115 peer reviewed papers selected from more than 250 submissions and ranging from the theoretical and conceptual to the strongly pragmatic and all addressing industrial best practice Topics covered include mathematical modeling and applications engineering applications and scientific computations and the simulation of intelligent systems Providing an overview of recent development and with a mix of practical experiences and enlightening ideas the book will be of interest to researchers and practitioners everywhere Invisible in the Storm Ian Roulstone, John Norbury, 2013-02-24 They explore how weather forecasters today formulate their ideas through state of the art mathematics taking into account limitations to predictability *Mathematics of Data/image Coding, Compression, and Encryption*, 2005

Mathematics/science Education and Technology, 1994 Gary H. Marks, 1994 **Machine Vision for Industry 4.0**

Roshani Raut, Salahddine Krit, Prasenjit Chatterjee, 2022-03-22 This book discusses the use of machine vision and technologies in specific engineering case studies and focuses on how machine vision techniques are impacting every step of industrial processes and how smart sensors and cognitive big data analytics are supporting the automation processes in Industry 4.0 applications. Industry 4.0 the Fourth Industrial Revolution combines traditional manufacturing with automation and data exchange. Machine vision is used in the industry for reliable product inspections, quality control, and data capture solutions. It combines different technologies to provide important information from the acquisition and analysis of images for robot-based inspection and guidance. Features: Presents a comprehensive guide on how to use machine vision for Industry 4.0 applications such as analysis of images for automated inspections, object detection, object tracking, and more. Includes case studies of Robotics Internet of Things with its current and future applications in healthcare, agriculture, and transportation. Highlights the inclusion of impaired people in the industry, for example, an intelligent assistant that helps deaf-mute individuals to transmit instructions and warnings in a manufacturing process. Examines the significant technological advancements in machine vision for Industrial Internet of Things and explores the commercial benefits using real-world applications from healthcare to transportation. Discusses a conceptual framework of machine vision for various industrial applications. The book addresses scientific aspects for a wider audience such as senior and junior engineers, undergraduate and postgraduate students, researchers, and anyone interested in the trends, development, and opportunities for machine vision for Industry 4.0 applications.

Harnessing Light National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Committee on Optical Science and Engineering, 1998-08-25 Optical science and engineering affect almost every aspect of our lives. Millions of miles of optical fiber carry voice and data signals around the world. Lasers are used in surgery of the retina, kidneys, and heart. New high-efficiency light sources promise dramatic reductions in electricity consumption. Night vision equipment and satellite surveillance are changing how wars are fought. Industry uses optical methods in everything from the production of computer chips to the construction of tunnels. Harnessing Light surveys this multitude of applications as well as the status of the optics industry and of research and education in optics and identifies actions that

could enhance the field's contributions to society and facilitate its continued technical development

The Mathematics of the Uncertain Eduardo Gil, Eva Gil, Juan Gil, María Ángeles Gil, 2018-02-28

This book is a tribute to Professor Pedro Gil who created the Department of Statistics OR and TM at the University of Oviedo and a former President of the Spanish Society of Statistics and OR SEIO. In more than eighty original contributions it illustrates the extent to which Mathematics can help manage uncertainty, a factor that is inherent to real life. Today it goes without saying that in order to model experiments and systems and to analyze related outcomes and data it is necessary to consider formal ideas and develop scientific approaches and techniques for dealing with uncertainty. Mathematics is crucial in this endeavor as this book demonstrates. As Professor Pedro Gil highlighted twenty years ago, there are several well known mathematical branches for this purpose including Mathematics of chance, Probability and Statistics, Mathematics of communication, Information Theory and Mathematics of imprecision, Fuzzy Sets Theory and others. These branches often intertwine since different sources of uncertainty can coexist and they are not exhaustive. While most of the papers presented here address the three aforementioned fields, some hail from other Mathematical disciplines such as Operations Research, others in turn put the spotlight on real world studies and applications. The intended audience of this book is mainly statisticians, mathematicians and computer scientists but

practitioners in these areas will certainly also find the book a very interesting read **Computational Intelligence in Communications and Business Analytics** Jyoti Prakash Singh, Maheshwari Prasad Singh, Amit Kumar Singh, Somnath Mukhopadhyay, Jyotsna K.
