*Lexile – This conversion chart is based on levels from the published "Lexile Framework" chart. A smooth curve was fit through grade-level points indicated here, and regression analysis provided the equation:

$$\text{Lexile} = 500Ln(\text{Gr. Level}) \text{ or the counterpart } \text{Gr. Level} = e^{(\text{Lexile})/500}$$

The resulting regression equation was then used to calculate the educational grade levels in the above table cells. Please note these levels are general and become more fluid at the upper ranges of this chart.

all levels are professionals always learning and growing in knowledge that theory that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching In our unique program students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching the program is heavily field based and it depends on the effectiveness of mentoring throughout the methods coursework and the first semester of full time teaching Students tell us this guidance and support is invaluable and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings Students hear best practice information from us in methods classes and they receive ample exposure to the research supporting our field but have a hard time implementing research based practices in their classroom settings and an even harder time finding it in the classrooms around them Pasadena Bulletin of Research, Personnel and Service.
