**Catalog It!** Allison G. Kaplan, 2015-12-07 Whether you're a practicing cataloger looking for a short text to update you on the application of RDA to cataloging records or a school librarian who needs a quick resource to answer cataloging questions this guide is for you. Since the last edition of this invaluable text was published the library world has experienced a revolution in descriptive cataloging the likes of which has not been seen since the early 1980s. This updated third edition of an established and well-respected guide makes it easy for you to stay in step with those monumental changes. The book will help you understand the latest fundamentals of cataloging so you can get items on the library shelves quickly and efficiently. Every chapter has been revised. Changes in standards including RDA and BISAC that were alluded to in the second edition are discussed in depth and illustrated with explanations and sample problem sets are included so you can put theory into practice. In addition the book provides you with clear headings for easy scanning as well as cheat sheets and templates for creating records for book and non-book items. Previous editions of this text have been used by library practitioners and library and information science professors across the country because of its spot-on easy-to-follow guidance on cataloging for school libraries. This new edition builds upon those strengths adding everything you need to know about current groundbreaking changes.

*Find the Information You Need!* Cheryl Knott, 2016-02-15 Find the Information You Need is designed for the person who suspects that Google and Facebook aren't always giving them the best results for their specific information needs. Created for anyone who wants to understand how to select better information resources, deploy smarter search strategies and evaluate results more effectively Find the Information You Need provides concrete exercises demonstrating successful queries on a variety of topics, clear explanations of search techniques and when to use them, descriptions of the different types of information resources available including commercial databases, digital libraries and open access repositories and helpful advice about evaluating and organizing search results. No existing book offers what Find the Information You Need does: a plain language text that teaches the layperson, the end user, what information brokers, competitive intelligence professionals and librarians know about finding authoritative information. A key advantage of this handbook is its arrangement. Students in an information discovery course can work through the book in a linear fashion from beginning to end. Others can dip into the text at any point that serves their needs. If someone is only interested in figuring out the best non-profit for their donations of money and time they can use the chapter presenting exercises and explanations for exactly that kind of search. If they're intrigued by the exercises they can use the chapters explaining the more technical side of information organization and access to learn more. Find the Information You Need is organized into two main sections. Section I: Make It Work helps the become a better searcher right away by supplying practical exercises to try. The six chapters in Section I focus on concrete steps to take for results and gives only as much explanation as needed to prevent confusion. The six chapters in Section II: How and Why It Works provide technical details and explanations of search systems.

and retrieval methods Three appendices present carefully selected web based resources where readers can find information for a broad swath of subjects Appendix I focuses on commercial databases accessible from state library websites at no charge to residents of the respective states Appendix II lists freely available encyclopedias including not only Wikipedia but many others that are more focused and more authoritative Appendix III provides links to a variety of information resources including health related data and guidance from U S government agencies huge digital libraries from major educational institutions and other troves of knowledge treasures Find the Information You Need can be used by high school and college students undertaking research assignments But it treats such assignments as a quest for information that anyone in the real world of business government the sciences journalism and other fields might undertake As a result anyone wanting to go beyond the usual web search engine and the biases built into its algorithms can use the book to learn specific sophisticated resources and techniques not only to search but to also actually find useful authoritative information **Teaching Reading**
