Interview Summary

After having an interview with Rodrigues, a senior College student pursuing Bachelor's Degree in Business, I came to discover a lot regarding the field. The student is currently taking a major in Finance which he is so passionate about. Rodrigues expresses his interest in his career choice which began as early as he was in high school. He discovered that he loved mathematics and business, especially the calculations of accounts and finance topics. He explained how he loved doing extended research during his free times regarding the two subjects and realized they were to form the basis of his career choice. By the time he was joining college, he was very confident and sure that Finance the subject he loved the most. The key topics that Rodrigues covers in the course include micro and macroeconomics, business analysis, corporate finance, investment and portfolio management, financial theories and risk management, as well as personal finance and superannuation.

The topics that Rodrigues cover in his course have a lot to do with the real world situations experienced by the contemporary business atmosphere. Micro and macroeconomics are fundamental subjects offering knowledge regarding business and the financial markets as well as the necessary factors to consider in becoming a well-established entrepreneur. Corporate finance and portfolio management deal directly with the financial aspect of businesses including how to balance the costs and benefits of the company processes. Risk management also involves analysis of risks that affect the national and international markets including policies, currency
