Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Genetic Criticism Dirk Van Hulle, 2022-02-24 In Genetic Criticism Dirk Van Hulle introduces the study of creative processes to an Anglophone audience As a method in the study of literary writing processes genetic criticism is also a reading strategy The idea behind this book is

to introduce this strategy to a broader audience from interested readers and graduate students to early career researchers and literary critics In literary studies it is often obvious that a particular work somehow seems to hit a nerve but more challenging to pinpoint exactly why it works This book therefore starts from a clear basic assumption knowing how something was made can help us understand how and why it works This strategy is at the basis of many disciplines including art history By means of X ray technology or hyperspectral imaging it is possible to look at a painting as a multilayered object with not only spatial dimensions but also a temporal one This temporal dimension is the core of the reading strategy introduced in this book Note books marginalia manuscripts and typescripts even if one works with scans give a concrete dimension to literature which is a helpful reading strategy for many students On the one hand this involves concrete transferrable skills such as aspects of transcription and digital scholarly editing On the other hand it also involves more abstract theoretical issues relating to matters of authorship collaboration authority agency intention and intertextuality
