
READING ACTIVITIES

2.1. Explain which is the main difference between:

- the inner and the outer planets
The inner planets are the four planets *closest to the Sun*,
while the outer planets are the four planets *farthest from the Sun*.
The inner planets are *small and rocky* planets,
while the outer planets are *big and gaseous*.
The inner planets have *thick and light atmospheres*,
while the outer planets have *thick and dense atmospheres*.
The inner planets have *few satellites*,
while the outer planets have *many satellites*.
- asteroids and comets
Asteroids are *small rocky* bodies
while comets are bodies of *ice, dust and gas*.
Asteroids are in the *Asteroid Belt* and the *Kuiper Belt*,
while comets come from the *Oort cloud*.
- planets and dwarf planets
Planets are big round rocky or gaseous bodies that are alone in their orbit,
while dwarf planets are small and round rocky bodies which *have not cleared their orbit*
around the Sun of other similar bodies.

2.2. Look at the following chart about the main characteristics of the planets of the Solar System and answer the questions:

- Which planet is the smallest in the Solar System?
The smallest planet in the Solar System is **Mercury**.
- Which planet has the least satellites?
The planets which have the least satellites are **Mercury and Venus**.
- Which planet has a horizontal axis?
The planet which has a horizontal axis is **Uranus**.
- Which planet is the farthest to the Sun?
The farthest planet from the Sun is **Neptune**.
- Which planet has an atmosphere with oxygen?
The planet which has an atmosphere with oxygen is **the Earth**.
- Which planet has the lowest surface temperature?
The planet which has the lowest surface temperature is **Neptune**.
- Which planet has the highest surface temperature?
The planet which has the highest surface temperature is **Venus**.
- Which planet has the biggest rings?
The planet which has the biggest rings is **Saturn**.

2.3. Identify the following pictures:

It is Mars.

It is Jupiter.

It is a comet.

It is the Moon.

Note Taking The Solar System Answer Key

IM Harris

Note Taking The Solar System Answer Key:

The Solar System Jennifer Lawson, 2001 The 16 lessons in this module introduce students to the solar system through an investigation of the planets and the sun Students explore the earth sun relationship in terms of the day night cycle and the year cycle As well students investigate the characteristics of the moon its phases and its eclipses Students also explore gravity and the constellations and the history of space exploration Also included materials lists activity descriptions questioning techniques activity centre and extension ideas assessment suggestions activity sheets and visuals The module offers a detailed introduction to the Hands On Science program guiding principles implementation guidelines an overview of the skills that young students use and develop during scientific inquiry a list of children s books and websites related to the science topics introduced and a classroom assessment plan with record keeping templates

In Quest of the Solar System Theo Koupelis, 2010-02-04 Available with WebAssign Author Theo Koupelis has set the mark for a student friendly accessible introductory astronomy text with *In Quest of the Universe* He has now developed a new text to accommodate those course that focus mainly on planets and the solar system Ideal for the one term course *In Quest of the Solar System* opens with material essential to the introductory course gravity light telescopes the sun and then moves on to focus on key material related to our solar system Incorporating the rich pedagogy and vibrant art program that have made his earlier books a success Koupelis *In Quest of the Solar System* is the clear choice for students making their way through their first astronomy course

Each unit is divided into lessons that focus on specific curricular expectations. Each lesson has curriculum expectations lists, materials lists, activity descriptions, assessment suggestions, activity sheets, and graphic organizers.

Your Library Is the Answer Christina T. Russo, Cathy Swan, 2015-01-22. Today's tech-savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication attributes of their lives outside of education via the integration of cutting-edge technologies and new media in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning such as flipping the classroom or library. Readers of this book will find concrete step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of American Association of School Librarians (AASL) standards. The authors, both award-winning teachers, explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.

Help! I'm Teaching Middle School Science C. Jill Swango, Sally Boles Steward, 2003. Like your own personal survival guide, *Help! I'm Teaching Middle School Science* is a non-technical how-to manual, especially for first-year teachers. But even veteran teachers can benefit from the plentiful ideas, examples, and tips on teaching science the way middle schoolers learn best. The book covers all the basics: what to do on the first day of school, including icebreaker activities; preparing safe and effective lab lessons; managing the classroom; working with in-school teams as well as parents. But its practical and encouraging approach doesn't mean it shortchanges the basics of effective pedagogy. You'll learn how to handle cooperative learning and assessment; how to help students write effectively; and the importance of modeling for early adolescents.

[Interactive Notetaking for Content-Area Literacy, Levels K-2](#) Judith Goodman, 2018-04-02. Help students build content-area literacy through interactive notetaking. This resource provides creative strategies for developing students' interactive notetaking skills across the content areas. Lessons focus on topics including partner work, vocabulary comprehension, and summarizing to engage students in critical thinking and analysis. This grade-range-specific
