I. OBJECTIVES	
A. Content Standards	1. The formation of the elements during the Big Bang and during stellar evolution 2. The distribution of the chemical elements and the isotopes in the universe
B. Performance Standards	The learners shall be able to effectively present or discuss the aspects of a scientific theory in light of its evidence.
C. Learning Competencies and LC Code	Give evidence for and explain the formation of the light elements in the Big Bang theory (S11/12PS-IIIa-1)
D. Enabling Competencies	
E. Specific Objectives	At the end of the lesson, the learners are expected to: a. Briefly discuss the cosmology of the Big Bang model b. Provide an overview of the proof for the Big Bang model c. Write reactions involving the nucleosynthesis of the first elements
II. CONTENT	How the elements found in the universe were formed
III. LEARNING RESOURCES	
A. References	
1. Teacher's Guide Pages	pp 14-24
2. Learner's Materials Pages	
3. Textbook Pages

Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies, 2013 *Routledge Handbook of Primary Physical Education* Gerald Griggs, Kirsten Petrie, 2017-11-27 The Routledge Handbook of Primary Physical Education goes further than any other book in exploring the specific theoretical and practical components of teaching PE at the primary or elementary school level As the most comprehensive review of theory research and practice in primary PE yet published it represents an essential evidence based guide for all students researchers and practitioners working in this area Written by a team of leading international primary PE specialists from academic and practitioner backgrounds this handbook examines the three discourses that dominate contemporary PE health education and sport With case studies from twelve countries including the UK USA Canada Australia New Zealand Norway Spain and South Korea it provides a truly international perspective on key themes and issues such as primary PE pedagogy policy and curriculum development assessment and standards child development diversity and inclusion teacher training and professional development Offering an unprecedented wealth of material this handbook is an invaluable reference for any undergraduate or postgraduate degree programme in primary physical education or any primary teacher training course with a physical education element The National Children's Study 2014 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on the Design of the National Children's Study and Implications for the Generalizability of Results, 2014-08-26 The National Children's Study NCS was authorized by the Children's Health Act of 2000 and is being implemented by a dedicated Program Office in the Eunice Kennedy Shriver National Institute of Child Health and Human Development NICHD The NCS is planned to be a longitudinal observational birth cohort study to evaluate the effects of chronic and intermittent exposures on child health and development in the U S The NCS would be the first study to collect a broad range of environmental exposure measures for a national probability sample of about 100 000 children followed from birth or before birth to age 21 Detailed plans for the NCS were developed by 2007 and reviewed by a National Research Council Institute of Medicine panel At that time sample recruitment for the NCS Main Study was scheduled to begin in 2009 and to be completed within about 5 years However results from the initial seven pilot locations which recruited sample cases in 2009 2010 indicated that the proposed household based recruitment approach would be more costly and time consuming than planned In response the Program Office implemented a number of pilot tests in 2011 to evaluate alternative recruitment methods and pilot testing continues to date At the request of Congress The National

Children's Study 2014 reviews the revised study design and proposed methodologies for the NCS Main Study. This report assesses the study's plan to determine whether it is likely to produce scientifically sound results that are generalizable to the United States population and appropriate subpopulations. The report makes recommendations about the overall study framework, sample design, timing, content, and need for scientific expertise and oversight. The National Children's Study has the potential to add immeasurably to scientific knowledge about the impact of environmental exposures broadly defined on children's health and development in the United States. The recommendations of this report will help the NCS achieve its intended objective to examine the effects of environmental influences on the health and development of American children.
