Undersea Vehicles and National Needs National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Undersea Vehicles and National Needs, 1996-12-19 The United States faces decisions requiring information about the oceans in vastly expanded scales of time and space and from oceanic sectors not accessible with the suite of tools now used by scientists and engineers Advances in guidance and control communications sensors and other technologies for undersea vehicles can provide an opportunity to understand the oceans influence on the energy and chemical balance that sustains humankind and to manage and deliver resources from and beneath the sea This book assesses the state of undersea vehicle technology and opportunities for vehicle applications in science and industry It provides guidance about vehicle subsystem development priorities and describes how national research can be focused most effectively Proceedings of the International Conference on the Physics of Nuclear Science and Technology ,1998 *The Chemical News and Journal of Physical Science* ,1875 Nuclear Science Abstracts ,1976 Statistical Problems in Particle Physics, Astrophysics and Cosmology Louis Lyons, Mige Karagzel, 2006 These proceedings comprise current statistical issues in analyzing data in particle physics astrophysics and cosmology as discussed at the PHYSTAT05 conference in Oxford This is a continuation of the popular PHYSTAT series previous meetings were held at CERN 2000 Fermilab 2000 Durham 2002 and Stanford 2003 In depth discussions on topical issues are presented by leading statisticians and research workers in their relevant fields Included are invited reviews and contributed research papers presenting the latest state of the art techniques Chemical News and Journal of Physical Science ,1875 *Plasma Physics* James E. Drummond, 2013-01-01 A historic snapshot of the field of plasma physics this fifty year old volume offers an edited collection of papers by pioneering experts in the field In addition to assisting students in their understanding of the foundations of classical plasma physics it provides a source of historic context for modern physicists Highly successful upon its initial publication this book was the standard text on plasma physics throughout the 1960s and 70s Hailed by Science magazine as a well executed venture the three part treatment ranges from basic plasma theory to magnetohydrodynamics and microwave plasma physics Highlights include Klimontovich s article on quantum plasmas Buneman s writings on how to distinguish between attenuating and amplifying waves and Yoler s clear and cogent review of magnetohydrodynamics Professional atomic and plasma physicists and all students of plasma physics will appreciate this historic resource The Attenuation of Gamma Rays and Neutrons in Reactor Shields Herbert Goldstein, 1957 **Collected Reprints - Atmospheric Physics and Chemistry Laboratory** Atmospheric Physics and Chemistry Laboratory, 1977 *Prologue* ,1996 **Millennial Biology: The National Science Foundation and American Biology, 1975-2005** Donald J. McGraw, 2021-01-25 National Science Foundation NSF is a unique federal agency because it supports scientific research financially but does not engage in scientific work itself Its history is known only in part because the NSF is a vibrant

expanding and living entity that makes the final telling of its story impossible Much can be learned from its beginning as well as its component parts If the founding of the NSF in 1950 was couched in an era of physics especially atomic physics certainly by the end of the 20th century and the beginning of the 21st biology was and remains the queen of sciences for the predictable future This book highlights the elite status of America s biological sciences as they were funded affected and to a very real degree interactively guided by the NSF It examines important events in the earlier history of the Foundation because they play strongly upon the development of the various biology directorates Issues such as education applied research medical science the National Institutes of Health the beginnings of biotechnology and other matters are also discussed
