Languages John Grinstead,2009-10-22 This book contains 12 papers contributed by leading scholars in the field of language
development studying variants of the languages which originated on the Iberian peninsula The contributors examine
language development in both typically developing and language impaired populations who are learning language in diverse
learning conditions including language contact as well as monolingual and bilingual Spanish Catalan Galician and Euskera
This expansion and diversification of the database for studying language development is important because it creates new
opportunities for testing theoretical claims Our contributors reconsider theoretical claims relating to the purported adult like
nature of young children s grammars While some conclude for example that children in Mexico possess very adult like
semantic pragmatic competence in the domain of the pragmatic implicatures associated with existential quantifiers others
conclude that in particular sociolinguistic registers of Chilean Spanish children are late to develop adult like competence in
plural marking Taken together the contents of the volume illustrate how the linguistic diversity found in the distinct learning

Development of Past Tense Morphology in L2 Spanish M. Rafael Salaberry,2001-02-12 This book presents an extended
analysis of the development of L2 Spanish past tense morphology among L1 English speaking learners The study addresses
three major questions 1 what is the developmental pattern of acquisition of past tense verbal morphology among tutored
learners 2 what are the relevant factors that may account for the particular distribution of morphological endings especially
at the beginning stages and 3 how does instruction affect the movement from one stage to the next The analysis provides a
reassessment of the general claim of Andersen s lexical aspect hypothesis and proposes minor changes that may render the
hypothesis more appropriate for especially L2 classroom learning The study includes an overview of theoretical positions on
the notion of lexical versus grammatical aspect and a comparison of the findings from previous empirical studies on the
development of past tense verbal morphology among both classroom and naturalistic learners **Bulletin** United States.
