**Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2010** Tianzi Jiang, Nassir Navab, Josien P.W. Pluim, Max A. Viergever, 2010-09-21 The 13th International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2010 was held in Beijing China from 20-24 September 2010 The venue was the China National Convention Center CNCC China's largest and newest conference center with excellent facilities and a prime location in the heart of the Olympic Green adjacent to characteristic constructions like the Bird's Nest National Stadium and the Water Cube National Aquatics Center MICCAI is the foremost international scientific event in the field of medical image computing and computer assisted interventions The annual conference has a high scientific standard by virtue of the threshold for acceptance and accordingly MICCAI has built up a track record of attracting leading scientists engineers and clinicians from a wider range of technical and biomedical disciplines This year we received 786 submissions well in line with the previous two conferences in New York and London Three program chairs and a program committee of 31

scientists all with a recognized standing in the field of the conference were responsible for the selection of the papers. The review process was set up such that each paper was considered by the three program chairs, two program committee members and a minimum of three external reviewers. The review process was double blind so the reviewers did not know the identity of the authors of the submission. After a careful evaluation procedure in which all controversial and gray area papers were discussed individually, we arrived at a total of 251 accepted papers for MICCAI 2010 of which 45 were selected for podium presentation and 206 for poster presentation. The acceptance percentage 32% was in keeping with that of previous MICCAI conferences. All 251 papers are included in the three MICCAI 2010 LNCS volumes **PC Magazine**, 2001

Topics discussed include age determination in juveniles and adults, sex, race and ancestry determination, stature determination, dental and facial identification, skeletal trauma and bone pathology, taphonomy and comparative osteology and identification from soft tissues.

**Textbook of Adult Emergency Medicine E-Book** Peter Cameron, Mark Little, Biswadev Mitra, Conor Deasy, 2019-05-23 Since the first edition of Textbook of Adult Emergency Medicine was published twenty years ago, there has been enormous change in the way emergency care is delivered. This has occurred both in countries where emergency medicine was originally developed and in those where its application was limited because of cost. Emergency medicine is now perceived as the cornerstone of response to acute illness regardless of resources. This fully revised Fifth Edition provides clear and consistent coverage of this constantly evolving specialty. Building on the success of previous editions, it covers all the major topics relevant to the practice of emergency medicine. The book will prove invaluable to professionals working in this setting, including nurse specialists and paramedics who require concise, highly practical guidance incorporating the latest best practice and evidence-based guidelines. This edition comes with an enhanced electronic version with video and self-assessment content, providing a richer learning experience and making rapid reference easier than ever before, anytime, anywhere. A comprehensive textbook of adult emergency medicine for trainee doctors covers all the problems likely to present to a trainee in the emergency department. Chapters are highly readable and concise, boxes summarise chapter key points and highlight controversial areas of treatment. The content is highly practical, clinically orientated and thoroughly updated in all the core subjects. There have been major updates in topics such as airway shock and sepsis where guidelines have changed rapidly. The imaging chapters have also evolved with changing practice and improved technology to be concordant with evidence on the importance of image interpretation by emergency clinicians. There are major sections on other skills and issues of key importance to today's advanced emergency medicine practitioner, such as staffing, overcrowding.
