

# Reebops

A "Model" Organism for Teaching Genetic Concepts

The Reebop is a model organism for teaching genetic concepts. It is a simple, easy-to-raise organism that can be used to illustrate many genetic concepts. The Reebop is a diploid organism, meaning it has two sets of chromosomes. It is also a sexually reproducing organism, meaning it has male and female individuals. The Reebop is a good model organism for teaching genetic concepts because it is easy to raise, has a short life cycle, and its genetics are well understood.
