Touch in Sports Coaching and Physical Education Heather

Piper, 2014-08-07 In our increasingly risk averse society touch and touching behaviours between professionals and children have become a fraught issue In sports coaching and physical education touching young sports performers and participants has in some contexts come to be redefined as dubious and dangerous Coaches find themselves operating in a framework of regulations and guidelines that create anxiety for them and others and for many volunteer and sometimes professional coaches this fearful context has led them to question the risks and benefits of their continuing involvement in sport Touch in Sports Coaching and Physical Education is the first book to explore this difficult topic in detail Drawing on a series of international studies from the US UK Australia Canada Sweden and elsewhere it presents important new research evidence and examines theories of risk and moral panic that frame the discussion By challenging prevailing orthodoxies the book makes a significant contribution to critical discussion around practice pedagogy politics and policy in sport and physical education and also informs current debates around the nature and quality of all in loco parentis relationships *Examining Teach For All* Matthew A.M. Thomas, Emilee Rauschenberger, Katherine Crawford-Garrett, 2020-07-28 Winner 2022 Outstanding Book Award from the Society of Professors of Education Winner 2021 Book Award from the Globalization and Education SIG Comparative and International Education Society *Examining Teach For All* brings together research focused on Teach For All and its affiliate programmes to explore the organisation's impact on education around the world Teach For All is an expanding global network of programmes in more than 50 countries that aim to radically transform education systems by recruiting talented graduates to teach for two years in under resourced schools and developing them into lifelong advocates of reform The volume offers nuanced insights into the interests and contexts shaping Teach For All and the challenges and possibilities inherent in broader efforts to enact education reform on a global scale This volume is the first of its kind to present empirical research on the emergence and expansion of Teach For All programmes which replicate and adapt the Teach For America model around the world The volume traces the network's expansion from its initial launch in 2007 to its growing international presence as chapters present new research from national contexts as diverse as Bangladesh Lebanon and Spain Using evidence from a range of perspectives and research methodologies the chapters collectively highlight the ways in which Teach For All and its affiliate programmes are working to alter educational landscapes worldwide This book will be of great interest for scholars educators post graduate students and policymakers in the fields of comparative education teacher education education leadership and education policy It paves the way for future critical inquiry into this expanding global network as well as further investigations of educational change around the world

Childhood and the Classics Sheila Murnaghan, Deborah H. Roberts, 2018-03-09 The dissemination of classical material to children has long been a major form of popularization with far reaching effects although until very recently it has received almost no attention within the growing field of classical reception studies This volume explores the ways in which children encountered the world of ancient Greece and Rome in Britain and the United States over a century long period beginning in

the 1850s as well as adults literary responses to their own childhood encounters with antiquity Rather than discussing the role of classics in education it focuses on books read for enjoyment and on two genres of children s literature in particular the myth collection and the historical novel The tradition of myths retold as children s stories is traced in the work of writers and illustrators from Nathaniel Hawthorne and Charles Kingsley to Roger Lancelyn Green and Ingri and Edgar Parin D Aulaire while the discussion of historical fiction focuses particularly on the roles of nationality and gender in the construction of an ancient world for modern children The book concludes with an investigation of the connections between childhood and antiquity made by writers for adults including James Joyce Virginia Woolf and H D Recognition of the fundamental role in children s literature of adults ideas about what children want or need is balanced throughout by attention to the ways in which child readers have made such works their own The formative experiences of antiquity discussed throughout help to explain why despite growing uncertainty about the appeal of antiquity to modern children the classical past remains perennially interesting and inspiring

Learning Through Play for Children with PMLD and Complex Needs Ange Anderson,2022-01-31 This book examines the development of play skills and schemas to support children with learning differences and physical disabilities in learning to play It highlights the need for appropriate playground equipment in all school settings that educate children with physical disabilities and sensory needs to ensure equal opportunities for outdoor play Several play approaches for meeting sensory needs are discussed including Lego therapy Art therapy Sand play and Soft play Digital play for students with physical disabilities is an important chapter in the book Role play and the ways in which virtual reality and psychodrama support anxieties that some students have is another important chapter There is also a chapter devoted to parents on how they can support their child at home and how the school can support them At the end of the book there is a plethora of resources that readers can copy or adapt to suit their setting The book provides support for those managing outdoor play for these children at peak times of the day It shows how play based learning can work in a classroom setting the importance of sensory profiles and sensory play and how play therapy can aid neuroplasticity

Regulation and Genetics H. Fraenkel-Conrat, 2013-04-17 The time seems ripe for a critical compendium of that segment of the biological universe we call viruses Virology as a science having passed only recently through its descriptive phase of naming and numbering has probably reached that stage at which relatively few new truly new viruses will be discovered Triggered by the intellectual probes and techniques of molecular biology genetics biochemical cytology and high resolution microscopy and spectroscopy the field has experienced a genuine information explosion Few serious attempts have been made to chronicle these events This comprehensive series which will comprise some 6000 pages in a total of about 22 volumes represents a commitment by a large group of active investigators to analyze digest and expostulate on the great mass of data relating to viruses much of which is now amorphous and disjointed and scattered throughout a wide literature In this way we hope to place the entire field in perspective and to develop an invaluable reference and sourcebook for researchers and students at all levels This series is designed as a continuum that can be entered anywhere but which also provides a logical progression of developing facts and integrated concepts
