

IRAC: Jolly Trolley
Danielle A. Adams
Feb. 11, 2015

- Issue:** Is Benjamin's employer, the Jolly Trolley Co., liable for Benjamin's injuries? Is the Jolly Trolley Co. liable for Benjamin's 4 months unpaid wages?
- Facts:** Benjamin was a driver and tour guide with Jolly Trolley Co. His salary was \$1200 a month. Benjamin took his friends on a tour during off-duty hours last July. During the tour, Benjamin lost control of the trolley, and it smashed into a building. The trolley was destroyed, and Benjamin was injured. Jolly Trolley fired him and then sued Benjamin for destruction of the trolley. Benjamin believes the trolley malfunctioned and wants to sue Jolly Trolley for his injuries as well as for his last four months' wages, which were not paid.
- Rule of Law:** 1.) Code, § 114-102: In order for an injury to be compensable under the terms of the Workmen's Compensation Act, it must have been occasioned "by accident arising out of and in the course of the employment."
2.) OCGA § 34-9-17 is as follows: "Workmen's compensation shall not be allowed for an injury or death due to the employee's willful misconduct..."
- Analysis:** In the instant case, Benjamin was in commission of a traffic violation when he destroyed property at the time of the accident and his injury a direct result therein. Benjamin was not performing duties pursuant to his employment at the time of the accident. In New Amsterdam Cas. Co. v. Summrell, an injury arises "in the course of employment," within the meaning of the Workmen's Compensation Act, when it occurs within the period of the employment, at a place where the employee reasonably may be in the performance of his duties, and while he is fulfilling those duties or engaged in doing something incidental thereto. An accident arises "out of" the employment, when it arises because of it, as when the employment is a contributing proximate cause. This and the condition stated above must concur before the act can apply. New Amsterdam Cas. Co. v. Summrell, 30 Ga. App. 682, 118 S.E. 786 (1923). In Aetna Cas. & Sur. Co. v. Horca, the court upheld a denial of benefits from the claimant because "in this kind of a case the burden is on the claimant to prove that the injury for which compensation is sought arose out of and in the course of the employment before compensation can be awarded legally to the claimant. Aetna Cas. & Sur. Co. v. Horca, 71 Ga. App. 569, 31 S.E.2d 421, 422 (1944). Benjamin willfully violated

American Astronomical Society AAS Rodger Doxsey Travel Prize and with a foreword by thesis supervisor Professor Shardha Jogee at the University of Texas at Austin this thesis discusses one of the primary outstanding problems in extragalactic astronomy how galaxies form and evolve Galaxies consist of two fundamental kinds of structure rotationally supported disks and spheroidal triaxial structures supported by random stellar motions Understanding the balance between these galaxy components is vital to comprehending the relative importance of the different mechanisms galaxy collisions gas accretion and internal secular processes that assemble and shape galaxies Using panchromatic imaging from some of the largest and deepest space based galaxy surveys an empirical census of galaxy structure is made for galaxies at different cosmic epochs and in environments spanning low to extremely high galaxy number densities An important result of this work is that disk structures are far more prevalent in massive galaxies than previously thought The associated challenges raised for contemporary theoretical models of galaxy formation are discussed The method of galaxy structural decomposition is treated thoroughly since it is relevant for future studies of galaxy structure using next generation facilities like the James Webb Space Telescope and the ground based Giant Magellan Telescope with adaptive optics

Photometric Redshifts and High Redshift Galaxies Ray J. Weymann, 1999 The 52 papers respond to the explosion of the search for and discovery of high redshift galaxies and the application of broad band photometry to obtain remarkably reliable estimates of the redshifts of galaxies at all redshifts spurred not only by the Hubble Deep Fields but also by the advent of wide field CCDs on ground based telescopes and the development of sensitive infrared submillimeter and millimeter instrumentation They discuss techniques findings and integrating new data into existing models of galaxy
