David Lankes,2021-05-15 I deal for readers seeking a more comprehensive look at information dissemination technology its context and its impact on the way in which we now live Library Journal Starred Review Many of what we think of as Information Age tools and media computers cell phones the internet encryption and more evolved directly out of modern warfare These tools started with World War I which began not with arms but with England cutting off underwater cables to Germany and isolating it accelerated through World War II and the Cold War and now play a center role in both declared and non declared conflicts like election interference and cyberbattles We buy phones and smart speakers because they are new and unlock great potential Voice assistants like Siri and Alexa help us do our work and answer that one piece of trivia that bugs us Yet these devices are data gatherers They collect repackage and monetize our questions purchases photographs web surfing to form a data industry now larger than the oil industry Well over 100

years ago the data industry put in place a business model that trades our attention for news and entertainment That model has evolved into a complex art and science of message targeting and content ownership that has splintered communities while simultaneously concentrating media ownership to a few massive corporations Forged in War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good It tells a compelling and previously story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview Author David Lankes s work has been funded by organizations such as The MacArthur Foundation The Institute for Library and Museum Services NASA The U S Department of Education The U S Department of Defense The National Science Foundation and The U S State Department This his latest book will help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine

True-3D in Cartography Manfred Buchroithner,2012-01-03 As corroborated by the never sagging and even increasing interest within the last decade the intuitive attraction of True 3D in geodata presentation is well worth covering its current status and recent developments in a compendium like the present one It covers most aspects of auto stereoscopic representation techniques of both topographic and thematic geodata be they haptic or not Theory is treated as well as are many fields of concrete applications Displays for big audiences and special single user applications are presented well established technologies like classical manual fabrication of landscape reliefs contrast with cutting edge developments

Embedded Systems: An Integrated Approach LyLa B. Das,2012 Embedded Systems An Integrated Approach is exclusively designed for the undergraduate courses in electronics and communication engineering as well as computer science engineering This book is well structured and covers all the important processors and their applications in a sequential manner It begins with a highlight on the building blocks of the embedded systems moves on to discuss the software aspects and new processors and finally concludes with an insightful study of important applications This book also contains an entire part dedicated to the ARM processor its software requirements and the programming languages Relevant case studies and examples supplement the main discussions in the text
