School Grades are assigned using a weighted model of 80 percent achievement, as measured by end-of-grade testing, and 20 percent growth from one year to the next.

Performance is the total school score converted to a 100-point scale.

Growth indicates the progress students have made in a school from year to year.

Assessment is the combines score of language arts, math and science scores as calculated across five achievement levels.

Supreme Court,1982 Cases argued and determined in the Supreme Court of North Carolina *We Must Take Charge!* Chester E. Finn, Jr.,2008-06-30 According to leading education analyst Chester Finn a paradox lies at the heart of our educational trouble While Americans commonly acknowledge that public schools in general are a disaster polls consistently show that most parents teachers and administrators think their local schools and their own children are doing just fine The implications of this self congratulation are profound For if people believe their own schools and children are succeeding why should they feel compelled to change things Yet if we don t we will continue to watch the destruction of a system that already lacks accountability and quality control and is beset by a teaching profession compromised by bad ideas fads buck passing dubious theories and stodgy practices Fin proposes radical changes which he insists must be championed by all Americans if this atrophy is to be reversed First and most importantly he calls on us to reorganize education in relation to the results we want from it This means establishing a clearcut standard of intellectual achievement that we will oblige all of our schools to enforce and our children to meet To define this standard we will need to rebuild instruction around a national curriculum of core subjects history science geography math literature and writing And we must demand a more detailed flow of useful information including reliable testing about how our children are performing in relation to this standard Finn calls on us to give our children as much time as many options and as broad an array of resources as possible As he points out learning can take place as easily in July as it does in march as easily in a museum as it does in a classroom And if parents have choices in deciding which schools and programs best fit the needs of students they will have an added incentive in helping their children succeed He urges us to revitalize the means of delivering education from the bottom up by vesting as much authority as possible with educators in each individual school and holding them accountable for their performance For Finn the implementation of these radical measures is essential to produce not only a knowledgeable twenty first century work force that will keep our nation competitive but an informed and reasoning citizenry capable of participating fully in a democracy Challenging and candid this book will point the way for all those insisting on the best that our schools can offer The Crisis ,2002-09 The Crisis founded by W E B Du Bois as the official publication of the NAACP is a journal of civil rights history politics and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color For nearly 100 years The Crisis has been the magazine
