## **Ndrawing Question Paper 2014:**

*Collective and Collaborative Drawing in Contemporary Practice* Helen Gørrill, Jill Journeaux, 2018-01-23 Whilst both collective and collaborative drawing is being widely explored internationally both within and beyond educational institutions there is surprisingly little serious research published on the topic This realisation led to the first international Drawing Conversations Symposium accompanied by the Drawn Conversations Exhibition at Coventry University UK in December 2015 The two events drew a strong and global response and brought together a wide range of participants including academics artists researchers designers architects and doctoral students This book considers what happens and how when people draw together either in the form of a collaboration or through a collective process The contributions here serve to establish the field of collective and collaborative drawing as distinct from the types of drawing undertaken by artists designers and architects within a professional context The volume covers conversations through the act of drawing collaborative drawing drawing communities and alternative drawing collaborations

**Drawing Futures** Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

*WE The Artist, The Kabbalist & The CircleXperiment* Zenita Komad, 2015-12-09 For a young artist whose work is as cheeky as unconventional in both its form and aesthetics Zenita Komad is untypically straightforward in addressing spirituality In her project The Artist and the Kabbalist she speaks with celebrated scientist and Kabbalist Michael Laitman Saying and epigrams are transposed into her own visual language with humor and spiritual scrutiny The Artist The Kabbalist The CircleXperiment by Zenita Komad provides people with visual stimulation that immediately touches their hearts This is art that heralds the message of unity and connection as a solution to all problems with absolute contemporaneity and the urgency the times demand It speaks to us with intelligent imagery that gets us and keeps us thinking and feeling

**Drawing for Science Education**

Phyllis Katz,2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development in science teaching and learning
