- When a newborn becomes critically ill on the same day they have already received normal newborn care (99460, 99461, 99462), and the same individual or group assumes critical care, report initial critical care service (99468) with modifier 25 in addition to the normal newborn code.
- When a neonate, infant, or child requires initial critical care services on the same day the patient already has received hospital care or intensive care services by the same individual or group, only the initial critical care service code (99468, 99471, 99475) is reported.
- Time-based critical care services (99291, 99292) are not reportable by the same individual or different individual of the same specialty and same group, when neonatal or pediatric critical care services (99468-99476) may be reported for the same patient on the same day.

Neonatal And Pediatric Critical Care Coding Guidelines:

Design for Pediatric and Neonatal Critical Care Mardelle McCuskey Shepley, 2014-02-03 Design for Pediatric and Neonatal Critical Care provides an overview of the design and research issues associated with the development of environments for pediatric and neonatal intensive care. This is the first and only book dedicated to this topic and was created to support individuals interested in developing and studying critical care environments for children and their families. In addition to a detailed analysis of the literature from research and practice, the author provides a summary of the historical development of critical care for infants and children and information regarding the role of PICUs and NICUs in the critical care system. A discussion of current codes and future trends is also provided. Design for Pediatric and Neonatal Critical Care includes essays from prominent voices in the field ranging from inspired young architects and researchers to world renowned healthcare design and research icons. Illustrations of work that has been identified as exemplary or representative of recent directions are included, which will help those planning new or remodeled projects to identify and examine precedents. This book is intended to help designers and researchers enhance healing environments for young patients in critical care settings and provide information in support of the families and staff who provide care for these children and infants. **E&M Coding**

The book is also a handy resource you can turn to throughout your career. Unique decision trees show you how to logically assign a code. It's the only text that breaks down the decision making process into a visual and repeatable process. You'll learn exactly how to select the correct ICD 10 CPT and HCPCS codes. Each section parallels the Official Coding Guidelines with a special emphasis on commonly used codes. A wealth of learning tools and tips along with critical thinking exercises and real life case studies provide the practice you need to master coding. Brief reviews of A/P and pathophysiology put the codes into perfect context. **Fanaroff and Martin's**
