

COMPUTER NETWORKS LAB

Manual

Experiment No.1

Title: - Study of different types of Network cables and practically implement the cross-wired cable and straight through cable using clamping tool.

Objective: - Students will understand concepts of Cabling

S/W Requirement: - NA.

H/W Requirement :- RJ-45 connector, wire and clamping tool

Step 1: Strip the cable jacket about 1.5 inch down from the end.

Step 2: Spread the four pairs of twisted wire apart. For Cat 5e, you can use the pull string to strip the jacket farther down if you need to, then cut the pull string. Cat 6 cables have a spine that will also need to be cut.

Step 3: Untwist the wire pairs and neatly align them in the T568B orientation. Be sure not to untwist them any farther down the cable than where the jacket begins; we want to leave as much of the cable twisted as possible.

Step 4: Cut the wires as straight as possible, about 0.5 inch above the end of the jacket.

Network Infrastructure Lab Manual:

Designing a Microsoft Windows 2000 Network Infrastructure Lab Manual James Michael Stewart, 2002 **Data**

Communications and Networking Laboratory Manual Pasquale De Marco, 2025-04-13 Embark on an immersive journey through the world of data communications and networking with this comprehensive laboratory manual meticulously designed to transform theoretical concepts into tangible experiences. Written for students pursuing undergraduate or graduate studies in computer science engineering or related fields, this manual offers an unparalleled opportunity to reinforce classroom learning through hands-on experimentation and practical exercises. Through a series of carefully structured experiments, this manual delves into the intricacies of data transmission, network protocols, and network management. Each experiment is meticulously crafted to elucidate a specific aspect of data communications and networking, fostering a deeper understanding of the underlying principles and their practical applications. With a strong emphasis on experiential learning, this manual empowers students to actively engage with the concepts they encounter in the classroom. By conducting hands-on experiments, students gain firsthand experience in configuring and troubleshooting network devices, analyzing network traffic, and implementing various network protocols. This practical approach cultivates a profound comprehension of the subject matter and prepares students for success in their future careers. Furthermore, this manual is meticulously aligned with the latest industry standards and practices, ensuring that students acquire up-to-date knowledge and skills that are highly sought after in the job market. The experiments and exercises reflect real-world scenarios, enabling students to develop the critical thinking and problem-solving abilities essential for thriving in the dynamic field of data communications and networking. As students progress through the experiments, they will delve into topics such as network topologies, transmission media, data link protocols, network layer protocols, transport layer protocols, application layer protocols, network security, and network management. Each experiment is accompanied by clear instructions, detailed procedures, and thought-provoking questions that stimulate critical thinking and encourage students to explore beyond the confines of the laboratory. By seamlessly blending theoretical knowledge with practical application, this laboratory manual empowers students to master the intricacies of data communications and networking, equipping them with the skills and confidence needed to excel in their chosen field.
