

Network Connectivity Should Not Be An Afterthought

Why Stand-alone When You Can Connect

Canon's clear advantage lies in our seamless integration with customer networks, giving users the ability to leverage system capabilities from their desktops. In choosing Canon products, your organization will benefit from initial investment protection other manufacturers simply cannot match.

A New Level Of Printing Functionality

The imageRUNNER 2800 is ideally suited to handle the printing requirements of workgroups and departments, with a print controller capable of handling 20/100 Ethernet or Token Ring connections, using PostScript® 3 Emulation and PCL5e and PCL 6 print languages.

Canon has created print driver software designed with an easy-to-use user-interface that is friendly for the novice, yet capable enough to handle the demands of power-users. The driver software displays a dynamic image of the device, indicating installed hardware options, paper size, and paper levels. As attributes change, the driver automatically informs the users of the latest device capabilities. To further simplify use, Canon offers the ability to view page layout settings from within the driver prior to printing. Using this driver capability, users are assured their output will print as expected, with no surprises.

Other significant capabilities include the ability to save frequently used print settings, annotate documents, add watermarks, and select extensive document-finishing and booklet-making features.

We haven't forgotten the network administrator! Canon offers multiple installation methods, and ships the only driver software available on the market capable of discovering devices on the network. This allows administrators to automatically configure all equipped options with just a click of the mouse.

Canon has equipped these systems with extensive printing capabilities not found on traditional network laser printers. Some of these enhanced capabilities include the following:

Mail Box Printing – Users can send print data to personal mail boxes for integration with other stored images, thereby creating new compound documents.

Page Composer – Users can combine and print documents that were created in different applications as a single document, preview and manipulate the merged file through a thumbnail view, and change settings on-the-fly.

Secured Print – Permits entry of a confidential PIN from within the print driver. Printing will begin only upon user-entry of his/her confidential PIN number at the device.
