Figure 6: A circuit with a battery of EMF 12 V and internal resistance 1 Ω. The voltmeter is connected in parallel across the battery terminals. The circuit is completed by a parallel combination of two branches. The first branch contains a 4 Ω resistor in series with a 2 Ω resistor. The second branch contains a 2 Ω resistor in series with a 4 Ω resistor. An ammeter A is connected in series with the 2 Ω resistor in the second branch. A 12 Ω resistor is connected in parallel across the entire parallel combination.

1. (1 mark)

Superintendent of Documents,1964-07 **How We Teach Science** John L. Rudolph,2019-06-01 A former Wisconsin high school science

teacher makes the case that how and why we teach science matters especially now that its legitimacy is under attack Why teach science The answer to that question will determine how it is taught Yet despite the enduring belief in this country that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process Nearly all of the basic knowledge we have about the world is rock solid The science we teach in high schools in particular laws of motion the structure of the atom cell division DNA replication the universal speed limit of light is accepted as the way nature works Everyone also agrees that students and the public more generally should understand the methods used to gain this knowledge But what exactly is the scientific method Ever since the late 1800s scientists and science educators have grappled with that question Through the years they ve advanced an assortment of strategies ranging from the laboratory method to the five step method to science as inquiry to no method at all How We Teach Science reveals that each strategy was influenced by the intellectual cultural and political circumstances of the time In

some eras learning about experimentation and scientific inquiry was seen to contribute to an individual's intellectual and moral improvement while in others it was viewed as a way to minimize public interference in institutional science John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and ultimately determine how science is perceived and received by the public **Pratiyogita Darpan**, 2006-10 Pratiyogita Darpan monthly magazine is India's largest read General Knowledge and Current Affairs Magazine Pratiyogita Darpan English monthly magazine is known for quality content on General Knowledge and Current Affairs Topics ranging from national and international news issues personality development interviews of examination toppers articles write up on topics like career economy history public administration geography polity social environment scientific legal etc solved papers of various examinations Essay and debate contest Quiz and knowledge testing features are covered every month in this magazine
