Science the "write" Way Jodi Wheeler-Toppen, 2011 Writing skills are high on the list of real world requirements for all students. Including science students. Every scientific discipline needs professionals who can ably communicate in writing. Scientists must be able to describe their proposed studies for funding considerations, track their observations and results in their own notes, describe their experimental protocols for their peers to replicate, and synthesize their work to the wider world community.

Assessing Performance Robert L. Johnson, James A. Penny, Belita Gordon, 2008-10-10 A comprehensive resource for assessment practitioners, this book provides step by step guidance for developing, administering, scoring, and validating a range of performance tasks including literacy and other types of proficiency assessments. The authors explore how to establish the purpose of the assessment and how to develop scoring tools, train raters, reduce rater bias, review scores, and report results, and use item level and test level analyses to optimize reliability and validity. Clearly written and well organized, the book includes many practical examples and accessible explanations of concepts and statistical procedures. It encompasses the breadth of applications of performance assessment today, from educational testing and the credentialing of professionals to research and program evaluation. User friendly features include: Checklists of activities to complete at each stage of a performance assessment; End of chapter questions to facilitate self study; Annotated suggestions for further reading; A quick reference glossary of terms; Examples drawn from multiple educational and professional licensure contexts.

Student Successes With Thinking Maps® David N. Hyerle, Larry Alper, 2011-01-28 Use Thinking Maps as a GPS for student success. Neuroscientists tell us that the brain organizes information in networks and maps. What better way to teach students to express their ideas than with the same method used by the brain? Student Successes With Thinking Maps presents eight powerful visual models that boost all learners' metacognitive and critical thinking skills. Enriched with new research, a wealth of examples, and cross content applications, this novel and effective resource helps students: Organize thoughts; Examine relationships; Enhance reasoning skills; Create connections between subjects; Engage with content.
